DATE: OCTOBER 14, 1988
PROJECT No.:
KEY No.:
TO: ALL EMPLOYEES
FROM: JOHN TOMKINSON, GENERAL SERVICES MANAGER
SUBJECT: TIME CAPSULE
The University of Idaho has offered the Department some trees to plant as part of their 100-year anniversary. We thought that in conjunction with the planting we would bury a time capsule with items from the Transportation Department. A suggestion of two or three possible items to be placed in the capsule from each section would assure everyone being represented.
The dedication ceremony is proposed around the first part of November. An exact date will be determined in a couple of weeks. Please submit your list of suggestions to the General Services Section by Wednesday, October 19, 1988. The items will be selected and the Sections will be asked to produce the items by Monday, October 25.
This project should secure our place in history and be fun. The Materials Section has done the research on the construction of a time capsule and Al Stanley is fast becoming an expert in the preservation of possible artifacts.
Everyone's help would be greatly appreciated.
Thank you.
