

# Environmental analysis

The following areas are evaluated in the environmental assessment for the U.S. 20/26 corridor:

- Land use and consistency with local plans
- Transportation
- Geology and soils
- Noise
- Impacts to farmland
- Socioeconomics
- Cultural resources (historic sites)
- Air quality
- Visual quality
- Hazardous materials
- Surface water, floodplains, and groundwater
- Wetlands and waters of the U.S.
- Threatened and endangered species
