

CONSTRUCTION UPDATES

Broadway Interchange I-84 ramp changes Tuesday night (Dec. 23)

December 23, 2014

On Tuesday night (Dec. 23), crews will work overnight to shift traffic onto new temporary eastbound on-and-off ramps and westbound off-ramp at the Broadway Interchange.

- Flaggers will direct traffic overnight where the east- and westbound ramps intersect with Broadway Ave.
- Crews will finish installing temporary signals and striping the roadway.
- **Motorists will begin using the new temporary ramps on Wednesday morning, Dec. 24.**

The temporary eastbound on-ramp **will be shorter** so traffic will have less time to merge. ITD reminds motorists that through traffic needs to move to the left, if possible, near the eastbound I-84 on-ramp to accommodate the merging trucks.

Shifting traffic onto temporary ramps will allow crews to remove the old railroad bridges east of the interchange, remove the old ramps and build drainage areas.
