

Idaho Transportation Department

MilePoint Logs

Mile Point Logs contain events (e.g., bridges, passing lanes, intersections, historical sites, overhead utility crossings, etc.) that occur along state highways, and local highways that receive federal aid. All routes are listed in numeric order statewide and within each ITD district. All milepoint locations identified on a route are listed in ascending order, which typically runs south to north and west to east. ITD produces two basic types of MP Logs:

- State Highway System Logs consisting of Interstates, U.S. Highways and State Highways (I, US & SH)
and
- Non-State Highway Federal Aid System logs consisting of National Highway System, Surface Transportation Principle Arterials, Surface Minor Arterials and Surface Transportation Collectors (NHS, STP, SMA & STC, respectively).

This document will walk you through all the data fields in the MP Logs so you can better utilize the data in the reports.

MilePoint Logs

IDAHO TRANSPORTATION DEPARTMENT

MILEPOINT LOG - FEDERAL EFF DATE: 04/11/2013

County: All Urban Area: All Jurisdiction: All

Record Type: All Admin. Dist.: 6

SEGMENT CODE	MILEPOINT	DESCRIPTION OF MILEPOINT	CITY NAME	SEGMENT CODE	MILEPOINT	STATE HIGHWAY #

- Indicates which City the roadway lies within.
- Indicates the Mile Point and Segment Code of the intersecting roadway (roadway being intersected).
- Indicates Sign Type (I, US, SH) and Route Number for State Highways; Highway System Type (NHS, STP, SMA, STC, etc.) and route number for Federal Aid roadways—roadways are listed in the Log numerically by route number.
- Indicates the Route Type of the roadway, e.g., Main Route, Business Loop, Spur, Connector, etc.
- Indicates Direction of travel—Ascending/Descending, One-Way/Two-Way, Forward/Reverse—in relation to direction of Route.

MilePoint Logs

We are still experiencing some formatting issues with the new Logs. In some cases individual entries are listed inappropriately (see example below):
