

This page contains information about research projects that are currently underway.

- Project Description:
    - This project will verify the reliability of the Doppler Radar Wildlife Detection System in detecting large animals on or adjacent to the roadway. The effectiveness of the system in reducing vehicle speed and collisions with large wild mammals will be studied. Data will be collected on the behavior of both the animals and humans to gain insight on ways to reduce collisions.
  - The objectives of this project are:
    1. To determine the reliability of Doppler Radar Wildlife Detections System in detecting large mammals (deer size and larger).
    2. To determine the effectiveness of the system in reducing the number of wildlife/vehicle collision and vehicle speed in the area of wildlife passage across a highway.
  - Estimated Completion Date: June 30, 2016
  - Budget: \$68,960
  - Project Managers: Don Davis (208) 772-8019 [don.davis@itd.idaho.gov](mailto:don.davis@itd.idaho.gov)
  - Principal Investigator:
    - Marcel Huijser (406) 543-2377 [mhuijser@coe.montana.edu](mailto:mhuijser@coe.montana.edu)
    - Rob Ament (304) 924-1529 [drament@tecnopave.com](mailto:drament@tecnopave.com)
  - TAC Members:
    - Tim Cramer (208) 745-5602 [tim.cramer@itd.idaho.gov](mailto:tim.cramer@itd.idaho.gov)
    - Brad Wolfinger (208) 334-8163 [brad.wolfinger@itd.idaho.gov](mailto:brad.wolfinger@itd.idaho.gov)
    - Ned Parrish (208) 334-8296 [ned.parrish@itd.idaho.gov](mailto:ned.parrish@itd.idaho.gov)
  - FHWA Advisors:
    - Brent Inghram (208) 334-9180 ext. 114 [brent.ingram@dot.gov](mailto:brent.ingram@dot.gov)
