

## **RP 272 – Idaho Statewide Freight Data and Commodity Supply Chain Analysis**

- Project Description:

The purpose of this project is to develop information on freight and commodity flows through the state of Idaho and to provide detailed analysis for major supply chains supporting the state's freight economy that can be used for freight planning and project prioritization.

- Project Objectives:

The objectives of this project are to:

1. Identify existing freight data sources that can be leveraged in order to develop a cost-effective freight data collection plan.
2. Develop a freight data collection plan that provides adequate geographical and seasonal data on freight movements throughout the state of Idaho.
3. Implement that freight data collection plan.
4. Analyze collected data in order to identify key freight supply-chains within the state.

- Estimated Completion Date: March 31, 2019

- Budget: \$186,000

- Project Manager: Jeffrey Marker (208) 334-8462 [jeffrey.marker@itd.idaho.gov](mailto:jeffrey.marker@itd.idaho.gov)
