This project, located at the intersection of SH-53 and Pleasant View approximately milepost 2.2, will construct two underpasses; one as an interchange for Pleasant View Road over SH-53 and the second over the railroad interchange and structure to accommodate traffic flows and realignment of the ramps and intersecting roadways. The project will reduce serious and fatal type crashes as well as improve mobility by providing on and off-ramps for Pleasant View Road, structure over the rail road. This project will also close two other railroad crossings and add illumination.

BENEWAH COUNTY	BR-OFF	BR-OFF	RW	-	-	-	-	-	-	-	-	-	-	-		
The Slaughter House Bridge on St. Joe City Road is a one lane bridge in very poor condition. The bridge has been on the watch list for Benewah County for many years. The guardrails are substandard and because of the narrow width, the rails are damaged from many logging truck impacts. This project is located at mile point 101.885.

This project will replace the Main St. Bridge located over Pine Creek between Silver Street and Seventh Street. The bridges substructure is in critical condition as the concrete girders and abutments have numerous cracks and both of the bridges pier walls have been undermined. The steel piles supporting the bridge have completely lost their protective coating and are heavily corroded and pitted. The bridge and approach guardrails are all substandard, highlighting serious safety concerns. This project is located on STC-5764 between mile points 1.39 and 1.79.

This project will improve safety and mobility on Hwy-95 in Bonners Ferry from (milepost 505) up through Hwy-2 (milepost 506.25). The safety and mobility improvements will be accomplished by expanding the two lane roadway in the business area, into three lanes and adding bicycle lanes. Also sidewalks will be updated to allow people with disabilities more access.

This project will replace the I-90 Elizabeth Park structure in order to improve safety and increase the vertical clearance. The existing structure currently has many deficiencies that include: excessive spalls and cracks, exposed reinforcement throughout structural components; along with a substandard vertical clearance. The new, wider bridge will be constructed on a variable raised profile that meets current standards and the minimum 17.0 feet vertical clearance over I-90. This project is located on I-90 at mile point 51.956.

STATE OF IDAHO (ITD)	BR-RESTORE	IM	RW									-	-	-	W G		
This project will replace the I-90 Division Street structures in order to improve safety and increase the vertical clearance. The existing structure currently has many deficiencies that include: excessive spalls and cracks, exposed reinforcement throughout structural components; along with a substandard vertical clearance. The new, wider bridge will be constructed on a variable raised profile that meets current standards and the minimum 17.0 feet vertical clearance over I-90. The project is located on I-90 at mile point 50.545.

This project will replace the existing bridge over the Union Pacific Railroad in Athol Idaho. The current bridge is inadequate to provide 129K access and is concerning to local law enforcement and the schools. The existing bridge is in poor condition with the superstructure and substructure identified by ITD as being in poor and fair condition and is a single span bridge, 181-feet in length and 24-feet wide curb face to curb face.
