* Available estimates are to be used for planning purposes only. FFY20 is last year of FAST transportation act. FY21 and later are flat-lined at FY20 levels.

Funds expressed in Year-Of-Expenditure Dollars assuming 2% annual inflation.

Funding levels assume 100% Obligation Authority

Includes set-asides for short/under-programmed programs

¹ Grant Anticipation Revenue Vehicle (GARVEE) bonds provide no net additional transportation funding as they are repaid with future federal funds via debt service.

FAST means "Fixing America's Surface Transportation"

STBG means "Surface Transportation Block Grant"

This project will fund the continued developments to the Idaho traveler information websites and telephone system. The expected benefits are improvements to highway safety and travel time aided by accurate and timely traveler information provided to the driver. Typical travel event information types are blocked lanes, closed highways, slick roads, high winds, low visibility, and detour routing. The information is available to the public on the internet and telephone.

The purpose of the WAQTC is to improve the quality of transportation products and services through an AASHTO R 25 compliant, comprehensive Technician Training and Qualification Program (TTQP). The TTQP program provides a cost-effective means to meet the requirements of 23 CFR 637.209 b which requires 'all sampling and testing data . . . be executed by qualified sampling and testing personnel.' WAQTC is focused in three main areas: Standardizing test methods (WAQTC, AASHTO, and ASTM), accreditation of the Transportation Technician Qualification Program (TTQP), and working together on national programs of significance including research, training, and technology deployment.

The Clear Roads Pooled Fund Program is a collaborative effort by ITD and 28 other States to share costs for winter maintenance research. By evaluating materials, equipment and methods in real-world conditions, the program identifies the most effective techniques and technologies to save agencies money, improve safety and increase efficiency.

The objective of this study is to focus on the successful deployment of performance engineered mixtures. This will involve building off the foundational work that FHWA and the "PEM Champion States" have done, with emphasis on implementation, education and training, adjusting the specification values to relate accurately to good pavement performance in the field, and continued development of relating early age concrete properties to performance.

Increasingly, state departments of transportation (DOTs) are challenged to design and build longer life concrete pavements that result in a higher level of user satisfaction for the public. One of the strategies for achieving longer life pavements is to use innovative materials and construction optimization technologies and practices. In order to foster new technologies and practices, experts from state DOTs, Federal Highway Administration (FHWA), academia and industry must collaborate to identify and examine new concrete pavement research initiatives. The purpose of this pooled fund project is to identify, support, facilitate and fund concrete research and technology transfer initiatives.

Only through the growth of a positive safety culture can significant and sustainable reductions in crash fatalities and serious injuries be achieved. Towards that end, this pooled fund program will: (1) conduct research to identify solutions to specific culture-based traffic safety problems, taking advantage of the implementation opportunities to improve traffic safety; (2) develop resources to enhance understanding and application of traffic safety culture strategies; and (3) provide technology transfer of best practices in traffic safety culture strategies.
