* Available estimates are to be used for planning purposes only. FFY20 is last year of FAST transportation act. FY21 and later are flat-lined at FY20 levels.
 Funds expressed in Year-Of-Expenditure Dollars assuming 2% annual inflation.
 Funding levels assume 100% Obligation Authority
¹ Grant Anticipation Revenue Vehicle (GARVEE) bonds provide no net additional transportation funding as they are repaid with future federal funds via debt service.
 FAST means "Fixing America's Surface Transportation"
 STBG means "Surface Transportation Block Grant"

The objective of the Roadside Safety Pooled Fund Program is to provide a cooperative approach to conducting research on roadside safety hardware. Emphasis will be placed on assisting State DOTs with their implementation of AASHTO's Manual for Assessing Safety Hardware (MASH) and addressing other roadside safety needs of common interest.														
Another objective of this pooled fund research to provide each participating state an opportunity to send a representative to an annual meeting to collaborate with other state DOT safety engineers to assess best practices, new regulatory issues, risk management strategies, and other matters pertaining to roadside safety. Participation in this meeting is funded through the state's annual program contribution.

The purpose of the WAQTC is to improve the quality of transportation products and services through an AASHTO R 25 compliant, comprehensive Technician Training and Qualification Program (TTQP). The TTQP program provides a cost-effective means to meet the requirements of 23 CFR 637.209 b which requires 'all sampling and testing data . . . be executed by qualified sampling and testing personnel.' WAQTC is focused in three main areas: Standardizing test methods (WAQTC, AASHTO, and ASTM), accreditation of the Transportation Technician Qualification Program (TTQP), and working together on national programs of significance including research, training, and technology deployment.														
STATE, CLEAR ROADS WINTER HWY OPERATIONS PHS II			9	Construct	25	25	25	-	-	-	75	75	-	-

The objective of this pooled fund project is to develop and deploy methods and approaches to obtain vehicle volume and classification data with passively collected data.														
Volume data refers to the annual average daily traffic (AADT) for all vehicles (both passenger and trucks) covering all roadway functional classes by traffic link or finer levels of segmentation with emphasis on functional classes of minor arterials, collectors, and local roads. Volume data on high volume urban interstates is also highly desired as there is a greater risk for collecting this data in these environments because maintenance of traffic is more expensive and these activities can disrupt normal traffic patterns.

The research will improve asset management tools available to optimize limited resources and ensure the safety and serviceability of bridges and highways. The research envisions developing a handbook for implementation of Risk Based Inspection practices that will provide a resource to participating states, presenting examples and case studies that define suitable attributes and characteristic for RBI. Workshops and training will be provided to participating states to assist with implementation of RBI, and tools will be developed to assist with future implementation of the RBI technology. Analysis of the bridge inventory to evaluate risk-based strategies will provide data for better asset management.
