				RW	-	-	-	-	-	-	-	1,224	1,134	90				
Project to improve vehicle capacity, pedestrian accommodations and storm drain function at the intersection of 17th Street and Woodruff Avenue in Idaho Falls. The proposed intersection improvements are anticipated to construct an additional left-turn lane and a dedicated right-turn lane on each approach; however, the proposed lane configuration may change based on results of a traffic study, environmental constraints and right-of-way impacts.

				RW	-	-	-	-	-	-	-	-	-	-				
The City of Idaho Falls is working on a transition plan to upgrade all of the street crossings to meet the current ADA compliance guidelines. This project compliments and enhances the effort and work that has been completed to date on the city-wide street system in the neighborhoods and schools where street overlay projects are coordinated less often. This project will increase safety for up to 40 ramp locations. Pedestrians, including children and disabled patrons in these areas, may focus their attention better on monitoring for traffic and street obstructions as their effort to overcome high-back curb crossings will be mitigated.																		
US 20, JCT SH 87 TO MT ST LN (TARGHEE PASS) PH 1 & PH 2

This project will reconstruct and rehabilitate a section along 45th West St. between 65th St. and Hwy-20 in Bonneville county. This will be accomplished with a structural overlay (3 inches or more) throughout the whole section in order to strengthen the roadway structure. The County believes this will provide the structure needed to save this road before it needs major reconstruction.

US-26 from Idaho Falls to Wyoming is a rural, two- or four-lane highway with at grade intersections. Within the Idaho Falls area there are a few signalized intersections but the remainder are unsignalized intersections. As is typical with rural highways, some of the unsignalized intersections are some of our highest accident locations. These seem to be the intersections closer to Idaho Falls where traffic volumes are higher. This project will evaluate alternative intersection designs for limiting the movements through the intersection in order to reduce the conflicts in the intersections, thus increasing safety.
