Purchase data from vendor(s) to supplement the household travel survey data (2021) and census data. Examples of how big data will be used are 1) update the "external" trips (trips to / from the surrounding counties) rates and characteristics in the regional model 2) more detailed analysis of non-motorized travel 3) review of trips, travel time, time of day and mode to and from sub areas (smaller than cities) in the region to help refine specific parameters in the regional model.

This project will improve safety for roadway users by widening a bridge, widening shoulders, installing white thermoplastic rumble strips and flatten side slopes. This will remove obstructions to errant vehicles, increases the recovery area on pavement, provides drivers visual guidance with an alert of lane departure and improves recovery area with a reduction in overturning potential.
