Major traffic pattern changes starting tomorrow as part of Burley Interchange (Exit 208) reconstruction

Shoshone—Motorists should watch for new traffic patterns on State Highway 27 as part of the reconstruction of the northbound lanes and bridge over Interstate 84 at the Burley Interchange. Beginning tomorrow, the Idaho Transportation Department will implement the following changes while the new road and structure are under construction:

- Northbound and southbound SH-27 traffic will shift to the west.
- The I-84 westbound on-ramp to SH-27 will be shifted to the north.
- The westbound I-84 on-ramp will be closed on the west side of SH-27.
- The on-ramp located on the east side of SH-27 will provide westbound access to I-84. The on-ramp will be controlled by a temporary traffic signal.

Motorists should slow down and follow construction signage in the work zone to adjust to the new traffic pattern which will be in place until fall 2025.

Reconstruction of the Burley Interchange is expected to cost \$85.1 million.

Built in the early 1960s, the interchange has reached the end of its service life. ITD is focused on improving safety, mobility, and economic opportunity for all users who travel this important agricultural and industrial route.

Construction is being funded as part of Idaho Governor Brad Little's Leading Idaho transportation funding initiative. The Leading Idaho initiative allows ITD to take a deliberate approach to advance large projects that will enhance safety, improve mobility, further strengthen Idaho's economy, and positively impact the Magic Valley and communities across the state for years to come.
