Construction starts on US-95 Grangeville Truck Route Bypass Road today

GRANGEVILLE – Motorists can expect improvements at the intersection of U.S. Highway 95 and Truck Route Bypass Road at the north side of Grangeville starting today.

A northbound right turn lane and southbound left turn lane will be added to US-95. The turn bays will enhance safety by allowing turning traffic to pull out of the travel lanes to decelerate.

Additionally, about 100 feet of the Truck Route Bypass Road will be regraded to provide a smoother transition onto US-95. Other improvements on the project will include the installation of new culverts and regraded ditches for stormwater transport.

Lane closures with flaggers and pilot car should be expected. The work zone will be short in length and delays should be minimum at 15 minutes.

Construction will conclude by the beginning of August. Live traffic impacts across the region can be found by visiting 511.idaho.gov. Travelers can also dial 5-1-1 or download the app.
