New traffic signal will be installed at intersection of US-93 and SH-25

JEROME – The Idaho Transportation Department (ITD) will install a new traffic signal at the intersection of U.S. Highway 93 and State Highway 25 in Jerome. Construction is anticipated to begin this fall, in conjunction with work at US-93 and 300 South.

ITD has been conducting engineering analysis on this intersection for several years to determine the need for a traffic signal to ensure safe traffic mobility. Based on traffic volumes, ITD is preparing to install a signal. Electrical conduit and components were installed at this intersection during a past project to aid in future construction.

Historically, signal components have been on backorder so a completion date for the installation has not been identified but ITD anticipates beginning construction this fall with a final completion in the spring.
