

**STATE OF IDAHO**  
**TRANSPORTATION DEPARTMENT**

**Statewide ALTA Surveyor HIRING ROSTER**  
**REQUEST FOR STATEMENT OF QUALIFICATIONS: 19-ALTA**

**REQUEST FOR STATEMENT OF QUALIFICATIONS  
AND  
INSTRUCTIONS**

The Idaho Transportation Department [ITD] is soliciting Statement of Qualifications to fill a roster of firms demonstrating the ability to provide professional ALTA surveying services of the Idaho Transportation Department and represent the Agency's interests in having projects completed on-time, within budget, and as planned according to Idaho Code 67-2320. Surveying services will vary greatly with the individual projects within the state. The ITD will evaluate each Statement of Qualifications and will create one roster of qualified Surveyor firms for statewide use. This RFSOQ is to establish a statewide roster.

Firms are expected to have the expertise necessary to perform the duties described hereafter. The goal of this RFSOQ is to develop a roster of qualified surveying firms on whom the agency can call to work with agency personnel to oversee the completion of projects statewide.

ITD hereby requests Statement of Qualifications from firms who are interested in providing professional Surveying Services for the Idaho Transportation Department.

**STATEMENT OF QUALIFICATIONS DEADLINE AND DELIVERY REQUIREMENTS**

Statement of Qualifications must be received and time stamped by the Idaho Transportation Department at the address listed below **BEFORE 2:59:59 PM, M.T., on June 10, 2019**. The State of Idaho, Idaho Transportation Department, is not responsible for lost or undelivered Statement of Qualifications or for failure of the United States Postal Service, the Idaho State Capital Mall Central Mail Room, or any mail courier service to deliver Statement of Qualifications to the ITD by the SOQ deadline. Late Statement of Qualifications will not be accepted. Fax Statement of Qualifications will not be accepted.

Qualifications Delivery Address:

Idaho Transportation Department  
ATTN: Tony Pirc – RFSOQ Alta Surveyor Roster  
3311 W State Street  
Boise ID 83703

Statements of Qualifications are to be mailed in a sealed envelope and are to be marked in the lower left hand corner with the following information:

Statement of Qualifications for:	1
9-Statewide ALTA Surveyor Roster Request for Qualifications Due:	0
6/10/19 before 2:59:59 P.M. M.T.	

A Statement of Qualifications submitted using “Express/Overnight” services must be shipped in a separate sealed inner package identified as stated above and enclosed inside the “Express/Overnight” shipping package.

**QUESTIONS**

Further information is available by contacting Melinda Doan, Facility Management Contracting Officer by telephone at (208) 772-1270 or by email at [Melinda.doan@itd.idaho.gov](mailto:Melinda.doan@itd.idaho.gov).

## **SCOPE OF SERVICES**

The surveyors shall be licensed to practice in the State of Idaho. It is anticipated that surveying service providers selected by this RFSOQ process will be utilized for projects where:

1. The individual project fee may exceed the sum of twenty-five thousand dollars (\$25,000.00).
2. The individual project fee may be less than twenty-five thousand dollars (\$25,000.00).

The Idaho Transportation Department reserves the right to, at any time, issue an individual project RFSOQ that falls within the scope of work parameters of ALTA Surveyor Services RFSOQ without prejudice to ALTA Surveyor Services providers selected under this RFSOQ if in the best interest of the State of Idaho and the Idaho Transportation Department.

The successful ALTA Surveyors selected through this RFSOQ will provide services for projects, which may include, but are not limited to, system renewals, facility improvements, and/or capital projects. Each ITD project will be evaluated as to the appropriate level of services necessary to meet the agency's needs.

The successful ALTA Surveyors selected through this RFSOQ will have all personnel, materials, and equipment to perform and accurately record the work according to current *Minimum Standard Detail Requirements for ALTA/NSPS Land Title Surveys*. Selected Respondents will have the technical knowledge and skills necessary to perform the work as well as current professional registration, licensure, and/or certification in the State of Idaho.

Compensation to successful ALTA Surveyors surveys selected through this RFSOQ will be based on the types of personnel required for the work, the complexity of the work, the time required to complete the work, and the Selected Respondent's rates as negotiated and included in the professional services contract. **For this RFSOQ, please do not submit rate schedules as they cannot be considered and will be discarded.** Payment is typically based on hourly rates and not to exceed limit of reimbursable expenses.

**INSURANCE:** Prior to executing a professional services agreement with ITD, the successful ALTA Surveyors selected through this RFSOQ will be required to provide evidence of the coverages listed below and pay all costs associated with insurance coverage. Insurance policies or certificates of insurance will name ITD as the named insured, and the successful architectural and consulting engineer teams selected through this RFSOQ will maintain these minimum insurance coverages for the duration of the contract:

- a. Professional Liability/Errors and Omissions Coverage The Contractor shall maintain professional liability insurance covering any damages caused by an error, omission or any negligent acts. Combined single limit per occurrence shall not be less than \$1,000,000, or the equivalent. Annual aggregate limit shall not be less than \$2,000,000.
- b. Worker's Compensation Insurance The Contractor shall maintain worker's compensation insurance in amounts as required by statute in all states in which the Contractor performs work, and employer's liability insurance with a limit of \$100,000 Bodily Injury by Accident each Accident; \$100,000 Bodily Injury by Disease – each employee; and \$500,000 Bodily Injury by Disease – Policy Limit.

Successful ALTA Surveyors selected through this RFSOQ using design professionals as subconsultants will be required to obtain evidence that subconsultants have obtained the same minimum insurance coverages as is required above.

The Idaho Transportation Department is soliciting proposals from qualified surveyors for assistance in creating ALTA surveys of ITD for future and current facility construction projects. Standards and submission requirements follow.

## **MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS**

1. **Purpose** - Members of the American Land Title Association® (ALTA®) have specific needs, unique to title insurance matters, when asked to insure title to land without exception as to the many matters which might be discoverable from survey and inspection, and which are not evidenced by the public records.

For a survey of real property, and the plat, map or record of such survey, to be acceptable to a title insurance company for the purpose of insuring title to said real property free and clear of survey matters (except those matters disclosed by the survey and indicated on the plat or map), certain specific and pertinent information must be presented for the distinct and clear understanding between the insured, the client (if different from the insured), the title insurance company (insurer), the lender, and the surveyor professionally responsible for the survey.

In order to meet such needs, clients, insurers, insureds, and lenders are entitled to rely on surveyors to conduct surveys and prepare associated plats or maps that are of a professional quality and appropriately uniform, complete, and accurate. To that end, and in the interests of the general public, the surveying profession, title insurers, and abstractors, the ALTA and the NSPS jointly promulgate the within details and criteria setting forth a minimum standard of performance for ALTA/NSPS Land Title Surveys. A complete 2016 ALTA/NSPS Land Title Survey includes:

- (i) the on-site fieldwork required pursuant to Section 5,
- (ii) the preparation of a plat or map pursuant to Section 6 showing the results of the fieldwork and its relationship to documents provided to or obtained by the surveyor pursuant to Section 4,
- (iii) any information from Table A items requested by the client, and
- (iv) the certification outlined in Section 7.

2. **Request for Survey** - The client shall request the survey, or arrange for the survey to be requested, and shall provide a written authorization to proceed from the person or entity responsible for paying for the survey. Unless specifically authorized in writing by the insurer, the insurer shall not be responsible for any costs associated with the preparation of the survey. The request shall specify that an "**ALTA/NSPS LAND TITLE SURVEY**" is required and which of the optional items listed in Table A, if any, are to be incorporated. Certain properties or interests in real properties may present issues outside those normally encountered on an ALTA/NSPS Land Title Survey (e.g., marinas, campgrounds, trailer parks; easements, leases, other non-fee simple interests). The scope of work related to surveys of such properties or interests in real properties should be discussed with the client, lender, and insurer; and agreed upon in writing prior to commencing work on the survey. The client may need to secure permission for the surveyor to enter upon the property to be surveyed, adjoining properties, or offsite easements.

3. **Surveying Standards and Standards of Care**

- A. **Effective Date** - The 2016 Minimum Standard Detail Requirements for ALTA/NSPS Land Title Surveys are effective February 23, 2016. As of that date, all previous versions of the Minimum Standard Detail Requirements for ALTA/ACSM Land Title Surveys are superseded by these standards.
- B. **Other Requirements and Standards of Practice** - Many states and some local jurisdictions have adopted statutes, administrative rules, and/or ordinances that set out standards regulating the practice of surveying within their jurisdictions. In addition to the standards set forth herein, surveyors shall also conduct their surveys in accordance with applicable jurisdictional survey requirements and standards of practice. Where conflicts between the standards set forth herein and any such jurisdictional requirements and standards of practice occur, the more stringent shall apply.
- C. **The Normal Standard of Care** - Surveyors should recognize that there may be unwritten local, state, and/or regional standards of care defined by the practice of the "prudent surveyor" in those locales.
- D. **Boundary Resolution** - The boundary lines and corners of any property being surveyed as part of an ALTA/NSPS Land Title Survey shall be established and/or retraced in accordance with appropriate boundary law principles governed by the set of facts and evidence found in the course of performing the research and fieldwork.
- E. **Measurement Standards** - The following measurement standards address Relative Positional Precision for the monuments or witnesses marking the corners of the surveyed property.
  - i. "Relative Positional Precision" means the length of the semi-major axis, expressed in feet or meters, of the error ellipse representing the uncertainty due to random errors in measurements in the location of the monument, or witness, marking any corner of the surveyed property relative to the monument, or witness, marking any other corner of the surveyed property at the 95 percent confidence level. Relative Positional Precision is estimated by the results of a correctly weighted least squares adjustment of the survey.
  - ii. Any boundary lines and corners established or retraced may have uncertainties in location resulting from (1) the availability, condition, history and integrity of reference or controlling monuments, (2) ambiguities in the record descriptions or plats of the surveyed property or its adjoiners, (3) occupation or possession lines as they may differ from the written title lines, or (4) Relative Positional Precision. Of these four sources of uncertainty, only Relative Positional Precision is controllable, although, due to the inherent errors in any measurement, it cannot be eliminated. The magnitude of the first three uncertainties can be projected based on evidence; Relative Positional Precision is estimated using statistical means (see Section 3.E.i. above and Section 3.E.v. below).
  - iii. The first three of these sources of uncertainty must be weighed as part of the evidence in the determination of where, in the surveyor's opinion, the boundary lines and corners of the surveyed property should be located (see Section 3.D. above). Relative Positional Precision is a measure of how precisely the surveyor is able to monument and report those positions; it is not a substitute for the application of proper boundary law principles. A boundary corner or line may have a small Relative Positional Precision because the survey measurements were precise, yet still be in the wrong position (i.e., inaccurate) if it was established or retraced using faulty or improper application of boundary law

principles.

- iv. For any measurement technology or procedure used on an ALTA/NSPS Land Title Survey, the surveyor shall (1) use appropriately trained personnel, (2) compensate for systematic errors, including those associated with instrument calibration, and (3) use appropriate error propagation and measurement design theory (selecting the proper instruments, geometric layouts, and field and computational procedures) to control random errors such that the maximum allowable Relative Positional Precision outlined in Section 3.E.v. below is not exceeded.
- v. The maximum allowable Relative Positional Precision for an ALTA/NSPS Land Title Survey is 2 cm (0.07 feet) plus 50 parts per million (based on the direct distance between the two corners being tested). It is recognized that in certain circumstances, the size or configuration of the surveyed property, or the relief, vegetation, or improvements on the surveyed property, will result in survey measurements for which the maximum allowable Relative Positional Precision may be exceeded. If the maximum allowable Relative Positional Precision is exceeded, the surveyor shall note the reason as explained in Section 6.B.x. below.

4. **Records Research** - It is recognized that for the performance of an ALTA/NSPS Land Title Survey, the surveyor will be provided with appropriate and, when possible, legible data which can be relied upon in the preparation of the survey. The request for an ALTA/NSPS Land Title Survey shall set forth the current record description of the property to be surveyed or, in the case of an original survey prepared for purposes of locating and describing real property that has not been previously separately described in documents conveying an interest in the real property, the current record description of the parent parcel that contains the property to be surveyed.

In order to complete an ALTA/NSPS Land Title Survey, the surveyor must be provided with complete copies of the most recent title commitment or, if a title commitment is not available, other title evidence satisfactory to the title insurer. In addition, the surveyor must be provided with the following:

- (i) The following records established under state statutes for the purpose of imparting constructive notice of matters relating to real property (public records):
  - (a) The current record descriptions of any adjoining to the property to be surveyed, except where such adjoining are lots in platted, recorded subdivisions;
  - (b) Any recorded easements benefitting the property;
  - (c) Any recorded easements, servitudes, or covenants burdening the property;
- (ii) Any unrecorded documents affecting the property being surveyed and containing information to which the survey shall make reference, if desired by the client.

Except, however, if the documents outlined above in (i) and (ii) of this section are not provided to the surveyor or if non-public or quasi-public documents are required to complete the survey, the surveyor shall be required to conduct only that research which is required pursuant to the statutory or administrative requirements of the jurisdiction where the property being surveyed is located and that research (if any) which is negotiated and outlined in the terms of the contract between the surveyor and the client.

5. **Fieldwork** - The survey shall be performed on the ground (except as otherwise negotiated pursuant to Table A, Item 15 below, if selected by the client). The fieldwork shall include the following, located to what is, in the surveyor's professional opinion, the appropriate degree of precision based on (a) the planned use of the property, if reported in writing to the surveyor by the client, lender, or insurer, or (b) the existing use, if the planned use is not so reported:

**A. Monuments**

- i. The location, size, character, and type of any monuments found during the fieldwork.
- ii. The location, size, character, and type of any monuments set during the fieldwork, if item 1 of Table A was selected or if otherwise required by applicable jurisdictional requirements and/or standards of practice.
- iii. The location, description, and character of any lines that control the boundaries of the surveyed property.

**B. Rights of Way and Access**

- i. The distance from the appropriate corner or corners of the surveyed property to the nearest right of way line, if the surveyed property does not abut a right of way.
- ii. The name of any street, highway, or other public or private way abutting the surveyed property, together with the width of the travelled way and the location of each edge of the travelled way including on divided streets and highways. If the documents provided to or obtained by the surveyor pursuant to Section 4 indicate no access from the surveyed property to the abutting street or highway, the width and location of the travelled way need not be located.
- iii. Visible evidence of physical access (e.g., curb cuts, driveways) to any abutting streets, highways, or other public or private ways.
- iv. The location and character of vehicular, pedestrian, or other forms of access by other than the apparent occupants of the surveyed property to or across the surveyed property observed in the process of conducting

the fieldwork (e.g., driveways, alleys, private roads, railroads, railroad sidings and spurs, sidewalks, footpaths).

- v. Without expressing a legal opinion as to ownership or nature, the location and extent of any potentially encroaching driveways, alleys, and other ways of access from adjoining properties onto the surveyed property observed in the process of conducting the fieldwork.
- vi. Where documentation of the location of any street, road, or highway right of way abutting, on, or crossing the surveyed property was not disclosed in documents provided to or obtained by the surveyor, or was not otherwise available from the controlling jurisdiction (see Section 6.C.iv. below), the evidence and location of parcel corners on the same side of the street as the surveyed property recovered in the process of conducting the fieldwork which may indicate the location of such right of way lines (e.g., lines of occupation, survey monuments).
- vii. Evidence of access to and from waters adjoining the surveyed property observed in the process of conducting the fieldwork (e.g., paths, boat slips, launches, piers, docks).

**C. Lines of Possession and Improvements along the Boundaries**

- i. The character and location of evidence of possession or occupation along the perimeter of the surveyed property, both by the occupants of the surveyed property and by adjoining, observed in the process of conducting the fieldwork.
- ii. Unless physical access is restricted, the character and location of all walls, buildings, fences, and other improvements within five feet of each side of the boundary lines, observed in the process of conducting the fieldwork. Trees, bushes, shrubs, and other natural vegetation need not be located other than as specified in the contract, unless they are deemed by the surveyor to be evidence of possession pursuant to Section 5.C.i.
- iii. Without expressing a legal opinion as to the ownership or nature of the potential encroachment, the evidence, location and extent of potentially encroaching structural appurtenances and projections observed in the process of conducting the fieldwork (e.g., fire escapes, bay windows, windows and doors that open out, flue pipes, stoops, eaves, cornices, areaways, steps, trim) by or onto adjoining property, or onto rights of way, easements, or setback lines disclosed in documents provided to or obtained by the surveyor.

**D. Buildings**

The location of buildings on the surveyed property observed in the process of conducting the fieldwork.

**E. Easements and Servitudes**

- i. Evidence of any easements or servitudes burdening the surveyed property as disclosed in the documents provided to or obtained by the surveyor pursuant to Section 4 and observed in the process of conducting the fieldwork.
- ii. Evidence of easements, servitudes, or other uses by other than the apparent occupants of the surveyed property not disclosed in the documents provided to or obtained by the surveyor pursuant to Section 4, but observed in the process of conducting the fieldwork if they appear to affect the surveyed property (e.g., roads; drives, sidewalks, paths and other ways of access; utility service lines; water courses; ditches; drains; telephone, fiber optic lines, or electric lines; or water, sewer, oil or gas pipelines on or across the surveyed property and on adjoining properties).
- iii. Surface indications of underground easements or servitudes on or across the surveyed property observed in the process of conducting the fieldwork (e.g., utility cuts, vent pipes, filler pipes).
- iv. Evidence on or above the surface of the surveyed property observed in the process of conducting the fieldwork, which evidence may indicate utilities located on, over or beneath the surveyed property. Examples of such evidence include pipeline markers, manholes, valves, meters, transformers, pedestals, clean-outs, utility poles, overhead lines and guy wires.

**F. Cemeteries**

As accurately as the evidence permits, the perimeter of cemeteries and burial grounds, and the location of isolated gravesites not within a cemetery or burial ground, (i) disclosed in the documents provided to or obtained by the surveyor, or (ii) observed in the process of conducting the fieldwork.

**G. Water Features**

- i. The location of springs, ponds, lakes, streams, rivers, canals, ditches, marshes, and swamps on, running through, or outside, but within five feet of the perimeter boundary of, the surveyed property, observed during the process of conducting the fieldwork.
- ii. The location of any water feature forming a boundary of the surveyed property. The attribute(s) of the water feature located (e.g., top of bank, edge of water, high water mark) should be congruent with the boundary as described in the record description or, in the case of an original survey, in the new description (see Section 6.B.vi. below).

- 6. Plat or Map** - A plat or map of an ALTA/NSPS Land Title Survey shall show the following information. Where dimensioning is appropriate, dimensions shall be annotated to what is, in the surveyor's professional opinion, the appropriate degree of precision based on (a) the planned use of the property, if reported in writing to the surveyor by the client, lender, or insurer, or (b) existing use, if the planned use is not so reported.

**A. The evidence and locations gathered, and the monuments and lines located during the fieldwork**

**pursuant to Section 5 above, with accompanying notes if deemed necessary by the surveyor or as otherwise required as specified below.**

**B. Boundary, Descriptions, Dimensions, and Closures**

- i. (a) The current record description of the surveyed property, or  
(b) In the case of an original survey, the current record description of the parent tract that contains the surveyed property.
- ii. Any new description of the surveyed property that was prepared in conjunction with the survey, including a statement explaining why the new description was prepared. Except in the case of an original survey, preparation of a new description should be avoided unless deemed necessary or appropriate by the surveyor and insurer. Preparation of a new description should also generally be avoided when the record description is a lot or block in a platted, recorded subdivision. Except in the case of an original survey, if a new description is prepared, a note shall be provided stating (a) that the new description describes the same real estate as the record description or, if it does not, (b) how the new description differs from the record description.
- iii. The point of beginning, the remote point of beginning or point of commencement (if applicable) and all distances and directions identified in the record description of the surveyed property (and in the new description, if one was prepared). Where a measured or calculated dimension differs from the record by an amount deemed significant by the surveyor, such dimension shall be shown in addition to, and differentiated from, the corresponding record dimension. All dimensions shown on the survey and contained in any new description shall be ground dimensions unless otherwise noted.
- iv. The directional, distance and curve data necessary to compute a mathematical closure of the surveyed boundary. A note if the record description does not mathematically close. The basis of bearings and, where it differs from the record basis, the difference.
- v. The remainder of any recorded lot or existing parcel, when the surveyed property is composed of only a portion of such lot or parcel, shall be graphically depicted. Such remainder need not be included as part of the actual survey, except to the extent necessary to locate the lines and corners of the surveyed property, and it need not be fully dimensioned or drawn at the same scale as the surveyed property.
- vi. When the surveyed property includes a title line defined by a water boundary, a note on the face of the plat or map noting the date the boundary was measured, which attribute(s) of the water feature was/were located, and the caveat that the boundary is subject to change due to natural causes and that it may or may not represent the actual location of the limit of title. When the surveyor is aware of natural or artificial realignments or changes in such boundaries, the extent of those changes and facts shall be shown or explained.
- vii. The relationship of the boundaries of the surveyed property with its adjoining (e.g., contiguity, gaps, overlaps), where ascertainable from documents provided to or obtained by the surveyor pursuant to Section 4 and/or from field evidence gathered during the process of conducting the fieldwork. If the surveyed property is composed of multiple parcels, the extent of any gaps or overlaps between those parcels shall be identified. Where gaps or overlaps are identified, the surveyor shall, prior to or upon delivery of the final plat or map, disclose this to the insurer and client.
- viii. When, in the opinion of the surveyor, the results of the survey differ significantly from the record, or if a fundamental decision related to the boundary resolution is not clearly reflected on the plat or map, the surveyor shall explain this information with notes on the face of the plat or map.
- ix. The location of all buildings on the surveyed property, located pursuant to Section 5.D., dimensioned perpendicular to those perimeter boundary lines that the surveyor deems appropriate (i.e., where potentially impacted by a setback line) and/or as requested by the client, lender or insurer.
- x. A note on the face of the plat or map explaining the site conditions that resulted in a Relative Positional Precision that exceeds the maximum allowed pursuant to Section 3.E.v.
- xi. A note on the face of the plat or map identifying areas, if any, on the boundaries of the surveyed property, to which physical access within five feet was restricted (see Section 5.C.ii.).
- xii. A note on the face of the plat or map identifying the source of the title commitment or other title evidence provided pursuant to Section 4, and the effective date and the name of the insurer of same.

**C. Easements, Servitudes, Rights of Way, Access, and Documents**

- i. The location, width, and recording information of all plottable rights of way, easements, and servitudes burdening and benefitting the property surveyed, as evidenced by documents provided to or obtained by the surveyor pursuant to Section 4.
- ii. A summary of all rights of way, easements and servitudes burdening the property surveyed and identified in the title evidence provided to or obtained by the surveyor pursuant to Section 4. Such summary shall include the record information of each such right of way, easement or servitude, a statement indicating whether or not it is shown on the plat or map, and a related note if:
  - (a) the location cannot be determined from the record document;
  - (b) there was no observed evidence at the time of the fieldwork;

- (c) it is a blanket easement;
  - (d) it is not on, or does not touch, the surveyed property;
  - (e) it limits access to an otherwise abutting right of way;
  - (f) the documents are illegible; or
  - (g) the surveyor has information indicating that it may have been released or otherwise terminated.
- In cases where the surveyed property is composed of multiple parcels, indicate which of such parcels the various rights of way, easements, and servitudes cross or touch.
- iii. A note if no physical access to a public way was observed in the process of conducting the fieldwork.
  - iv. The locations and widths of rights of way abutting or crossing the surveyed property, and the source of such information, (a) where available from the controlling jurisdiction, or (b) where disclosed in documents provided to or obtained by the surveyor pursuant to Section 4.
  - v. The identifying titles of all recorded plats, filed maps, right of way maps, or similar documents which the survey represents, wholly or in part, with their recording or filing data.
  - vi. For non-platted adjoining land, recording data identifying adjoining tracts according to current public records. For platted adjoining land, the recording data of the subdivision plat.
  - vii. Platted setback or building restriction lines which appear on recorded subdivision plats or which were disclosed in documents provided or obtained by the surveyor.

**D. Presentation**

- i. The plat or map shall be drawn on a sheet of not less than 8 ½ by 11 inches in size at a legible, standard engineering scale, with that scale clearly indicated in words or numbers and with a graphic scale.
- ii. The plat or map shall include:
  - (a) The boundary of the surveyed property drawn in a manner that distinguishes it from other lines on the plat or map.
  - (b) If no buildings were observed on the surveyed property in the process of conducting the fieldwork, a note stating “*No buildings observed.*”
  - (c) A north arrow (with north to the top of the drawing when practicable).
  - (d) A legend of symbols and abbreviations.
  - (e) A vicinity map showing the property in reference to nearby highway(s) or major street intersection(s).
  - (f) Supplementary or detail diagrams when necessary.
  - (g) Notes explaining any modifications to Table A items and the nature of any additional Table A items (e.g., 21(a), 21(b), 21(c)) that were negotiated between the surveyor and client.
  - (h) The surveyor’s project number (if any), and the name, registration or license number, signature, seal, street address, telephone number, company website, and email address (if any) of the surveyor who performed the survey.
  - (i) The date(s) of any revisions made by the surveyor who performed the survey.
  - (j) Sheet numbers where the plat or map is composed of more than one sheet.
  - (k) The caption “ALTA/NSPS Land Title Survey.”
- iii. When recordation or filing of a plat or map is required by law, such plat or map shall be produced in recordable form.

7. **Certification** - The plat or map of an ALTA/NSPS Land Title Survey shall bear only the following certification, unaltered, except as may be required pursuant to Section 3.B. above:

To (name of insured, if known), (name of lender, if known), (name of insurer, if known), (names of others as negotiated with the client):

This is to certify that this map or plat and the survey on which it is based were made in accordance with the 2016 Minimum Standard Detail Requirements for ALTA/NSPS Land Title Surveys, jointly established and adopted by ALTA and NSPS, and includes Items \_\_\_\_\_ of Table A thereof. The fieldwork was completed on \_\_\_\_\_ [date].

Date of Plat or Map: \_\_\_\_\_ (Surveyor’s signature, printed name and seal with Registration/License Number)

8. **Deliverables** - The surveyor shall furnish copies of the plat or map of survey to the insurer and client and as otherwise negotiated with the client. Hard copies shall be on durable and dimensionally stable material of a quality standard acceptable to the insurer. A digital image of the plat or map may be provided in addition to, or in lieu of, hard copies pursuant to the terms of the contract. When required by law or requested by the client, the plat or map shall be produced in recordable form and recorded or filed in the appropriate office or with the appropriate agency.

**TABLE A**  
**OPTIONAL SURVEY RESPONSIBILITIES AND SPECIFICATIONS**

**If checked, the following optional items are to be included in the ALTA/NSPS LAND TITLE SURVEY, except as otherwise qualified (see note above):**

1.  Monuments placed (or a reference monument or witness to the corner) at all major corners of the boundary of the property, unless already marked or referenced by existing monuments or witnesses in close proximity to the corner.
2.  Address(es) of the surveyed property if disclosed in documents provided to or obtained by the surveyor, or observed while conducting the fieldwork.
3.  Flood zone classification (with proper annotation based on federal Flood Insurance Rate Maps or the state or local equivalent) depicted by scaled map location and graphic plotting only.
4.  Gross land area (and other areas if specified by the client).
5.  Vertical relief with the source of information (e.g., ground survey, aerial map), contour interval, datum, and originating benchmark identified.
6.  (a) If set forth in a zoning report or letter provided to the surveyor by the client, list the current zoning classification, setback requirements, the height and floor space area restrictions, and parking requirements. Identify the date and source of the report or letter.  
  
\_\_\_\_\_ (b) If the zoning setback requirements are set forth in a zoning report or letter provided to the surveyor by the client, and if those requirements do not require an interpretation by the surveyor, graphically depict the building setback requirements. Identify the date and source of the report or letter.
7.  (a) Exterior dimensions of all buildings at ground level.  
  
\_\_\_\_\_ (b) Square footage of:  
  
\_\_\_\_\_ (1) exterior footprint of all buildings at ground level.  
  
\_\_\_\_\_ (2) other areas as specified by the client.  
  
\_\_\_\_\_ (c) Measured height of all buildings above grade at a location specified by the client. If no location is specified, the point of measurement shall be identified.
8.  Substantial features observed in the process of conducting the fieldwork (in addition to the improvements and features required pursuant to Section 5 above) (e.g., parking lots, billboards, signs, swimming pools, landscaped areas, substantial areas of refuse).
9.  Number and type (e.g., disabled, motorcycle, regular and other marked specialized types) of clearly identifiable parking spaces on surface parking areas, lots and in parking structures. Striping of clearly identifiable parking spaces on surface parking areas and lots.
10. \_\_\_\_\_ (a) As designated by the client, a determination of the relationship and location of certain division or party walls with respect to adjoining properties (client to obtain necessary permissions).  
  
\_\_\_\_\_ (b) As designated by the client, a determination of whether certain walls are plumb (client to obtain necessary permissions).
11.  Location of utilities existing on or serving the surveyed property as determined by:
  - observed evidence collected pursuant to Section 5.E.iv.
  - evidence from plans requested by the surveyor and obtained from utility companies, or provided by client (with reference as to the sources of information), and
  - markings requested by the surveyor pursuant to an 811 utility locate or similar request

Representative examples of such utilities include, but are not limited to:

- Manholes, catch basins, valve vaults and other surface indications of subterranean uses;
- Wires and cables (including their function, if readily identifiable) crossing the surveyed property, and all poles on or within ten feet of the surveyed property. Without expressing a legal opinion as to the ownership or nature of the potential encroachment, the dimensions of all encroaching utility pole crossmembers or overhangs; and
- Utility company installations on the surveyed property.

Note to the client, insurer, and lender - With regard to Table A, item 11, source information from plans and markings will be combined with observed evidence of utilities pursuant to Section 5.E.iv. to develop a view of the underground utilities. However, lacking excavation, the exact location of underground features cannot be accurately, completely, and reliably depicted. In addition, in some jurisdictions, 811 or other similar utility locate requests from surveyors may be ignored or result in an incomplete response, in which case the surveyor shall note on the plat or map how this affected the surveyor's assessment of the location of the utilities. Where additional or more detailed information is required, the client is advised that excavation and/or a private utility locate request may be necessary.

12. \_\_\_\_\_ As specified by the client, Governmental Agency survey-related requirements (e.g., HUD surveys, surveys for leases on Bureau of Land Management managed lands).
13. \_\_\_\_\_ Names of adjoining owners according to current tax records. If more than one owner, identify the first owner's name listed in the tax records followed by "et al."
14. \_\_\_\_\_ As specified by the client, distance to the nearest intersecting street.
15. \_\_\_\_\_ Rectified orthophotography, photogrammetric mapping, remote sensing, airborne/mobile laser scanning and other similar products, tools or technologies as the basis for the showing the location of certain features (excluding boundaries) where ground measurements are not otherwise necessary to locate those features to an appropriate and acceptable accuracy relative to a nearby boundary. The surveyor shall (a) discuss the ramifications of such methodologies (e.g., the potential precision and completeness of the data gathered thereby) with the insurer, lender, and client prior to the performance of the survey, and (b) place a note on the face of the survey explaining the source, date, precision, and other relevant qualifications of any such data.
16.  Evidence of recent earth moving work, building construction, or building additions observed in the process of conducting the fieldwork.
17. \_\_\_\_\_ Proposed changes in street right of way lines, if such information is made available to the surveyor by the controlling jurisdiction. Evidence of recent street or sidewalk construction or repairs observed in the process of conducting the fieldwork.
18.  If there has been a field delineation of wetlands conducted by a qualified specialist hired by the client, the surveyor shall locate any delineation markers observed in the process of conducting the fieldwork and show them on the face of the plat or map. If no markers were observed, the surveyor shall so state.
19.  Include any plottable offsite (i.e., appurtenant) easements or servitudes disclosed in documents provided to or obtained by the surveyor as a part of the survey pursuant to Sections 5 and 6 (and applicable selected Table A items) (client to obtain necessary permissions).
20.  Professional Liability Insurance policy obtained by the surveyor in the minimum amount of \$\_\_\_\_\_ to be in effect throughout the contract term. Certificate of Insurance to be furnished upon request, but this item shall not be addressed on the face of the plat or map.
21. \_\_\_\_\_

---

## **SUBMISSION STANDARDS**

Submission standard of digital files containing plats and maps associated with surveying projects to ensure usable and correct information is delivered and can be used in conjunction with the department's GIS and Land Records systems.

### For CAD Drawing Files (AutoCAD DWG & DXF)

- Coordinate system and projection used in the drawing must be defined and visible on the drawing. If not specified on the drawing, it must be documented somewhere else (written on the CD, included in a Word document). Information must include:
  - Name of coordinate system and projection
  - State plane, where appropriate
  - Horizontal and vertical (if appropriate) datums (ex. Idaho State Plane, West Zone, datum NAD83 or NAD27)
  - Horizontal and vertical (if appropriate) units of measure (ex. feet or meters)
  - No local coordinate system will be used. All digital deliverables must represent the true coordinate system.
- Where the survey is to determine the boundary of a parcel, then the boundary must be included on one layer by itself; no other features can be present on the layer. If the survey is intending to reflect a linear feature, such as a centerline, then the centerline must be included on one layer by itself. Corners, monuments and other point features must also be on a separate layer.
- The layer name must have the word "DISCLAIMER", "EASEMENT", "RIGHT-OF-WAY" or some other name which clearly identifies the layer and the feature which it represents.
- Parcels must be represented as closed polygons on single layers; they cannot be represented by multiple layers which by themselves do not close.

### For ESRI (ArcView, ArcGIS) Shapefiles

- All shapefiles must have a projection file (.prj) with the correct coordinate system defined.
- All shapefiles shall have all drawing elements such as title blocks, callouts, text, neatlines, dimensions, scalebars, etc. removed.
- For cadastral surveys, the shapefile shall contain boundaries and corner locations in addition to any other features specified in the contract.
- For topographic surveys, the shapefile shall contain topographic contours, spot elevations and any features used to develop the 3D model upon which the contours were based (i.e. breakline features such as roads, streams, edge of pavement, building footprints, etc.). All contours and spot elevations shall be 3D with elevation attributes associated with each feature. Other map features shall be present if specified in the contract.
- In all other cases, delivered shapefiles shall contain only those mapped features specified in the contract.
- At a minimum the following component files shall be included: .shp, .shx, .dbf, .prj.

The Agency reserves the right to investigate and confirm the candidate's financial responsibility. This may include financial statements, bank references, and interviews with past consultants, employees, or creditors. Unfavorable responses to these investigations may be grounds for rejection.

The Agency reserves the right to contact and interview firms listed references to confirm responsibility. Unfavorable responses to these interviews may be grounds for rejection.

## **SOLICITATION CYCLE**

It is anticipated that the solicitation cycle for RFSOQ 19-Statewide-ALTA Surveyor shall be in force until December 31, 2023. The Idaho Transportation Department reserves the right to award future projects based on qualifications and selection by this RFSOQ, if deemed to be in the best interest of the Idaho Transportation Department.

## **STATEMENT OF QUALIFICATIONS CONTENT AND FORMAT**

It is essential that the Agency be able to easily match a vendor's response with this RFSOQ's requirements for information. This RFSOQ and its format should be incorporated into the actual response. Where asked, indicate compliance and/or note any exceptions to the requirements and provide responses to any questions that follow.

The original printed version and three copies of the SOQ's must be submitted on 8½ by 11-inch paper in standard three-ring binders. Please include a thumb drive copy (in pdf) of your SOQ along with the printed copies. Foldouts for charts, tables, spreadsheets, and single-line diagrams are acceptable. Pre-printed materials, such as brochures or technical documents, may be included, but whenever possible should be placed within the three-ring binders in the appropriate sections. **Submittals not provided in the following format will complicate the evaluation and comparison process and may therefore be declared non-responsive.**

**The Statement of Qualifications must be organized in sections containing the numbered sections below:**

- 1. Cover Letter (Mandatory)**
- 2. Surveyor information form (Mandatory)**
- 3. Example of completed Alta Survey (Mandatory)**
- 4. Completed Company Profile**

Describe your firm:

- History
- Size
- Resources
- Special expertise
- Volume of work

**5. Project Approach**

- Describe your approach to providing the service outlined in "Scope of Services".
- Discuss how you provide leadership to facilitate teamwork and communication among all parties.
- Provide a professional resume for each key person proposed to be assigned to the Agency's projects.
- Describe the proposed roles and responsibilities of key personnel.

**6. Experience**

- Briefly describe other projects designed or executed by your firm that demonstrate relevant experience. Extensive descriptions of vaguely related projects are discouraged.
- List all projects for which you have performed similar work in the past three years; please also identify those performed for public agencies. For each project listed, include the name, title, address, phone number and email address of a person who may be contacted regarding your performance on the project. Projects listed for which your firm worked in an auxiliary capacity or in a venture or partnership should include the name, title, address, phone number, email address and a contact person of the lead firm.

**7. Additional Considerations**

- Clarity
- Completeness
- Quality of submission.

**8. Work area preference.** This item will not be evaluated. It is informational purposes only.

Please use the document below to identify the ITD Districts in which your firm would prefer to work. You may select any or all Districts. Selecting specific ITD Districts will not preclude you from being considered for the Statewide Roster. The Idaho Transportation Department intends to utilize this information from the firms that are selected for the Statewide Roster to assist with firm selection and negotiations for specific projects only.

Place a checkmark in the circle, or circles, below to identify which ITD Districts your firm prefers to perform work within.

## ITD Districts & Counties

<input type="radio"/> DISTRICT 1	<input type="radio"/> DISTRICT 2	<input type="radio"/> DISTRICT 3	<input type="radio"/> DISTRICT 4	<input type="radio"/> DISTRICT 5	<input type="radio"/> DISTRICT 6

		Gem	Lincoln	Oneida	Jefferson
		Owyhee	Minidoka	Power	Lemhi
		Payette	Twin Falls		Teton
		Washington			Madison
		Valley			

## **SELECTION PROCESS**

The purpose of this Request for Statement of Qualifications is to establish a hiring roster for statewide projects from which the ITD may choose to contract throughout the contract period(s). Any resultant agreement will not be a guarantee to purchase services. The ITD may choose to interview several of the top firms. However, at its discretion, The ITD may dispense with interviews and select a firm to perform individual project work. Listed references may be contacted to determine a firm's responsibility.

The ITD expects to evaluate proposals and provide written notification of the statewide roster within 30 days of receipt of submittals.

## **PROPOSAL GUIDELINES**

1. The ITD will not be liable for any costs incurred in the preparation and production of a proposal, or any work performed prior to the execution of a contract or task order.
2. All proposals and other materials will become the property of the ITD.
3. The ITD is a public agency. All documents in its possession are public records subject to inspection and copying under the Idaho Public Records Act, Chapter 1, Title 74, Idaho Code. The Public Records Act contains certain exemptions – one of which that is potentially applicable to part of your response is an exemption for trade secrets. Trade secrets include a formula, pattern, compilation, program, computer program, device, method, technique or process that derives economic value, actual or potential, from not being generally known to, and not being readily ascertainable by proper means by other persons and is subject to the efforts that are reasonable under the circumstances to maintain its secrecy.

If any Respondent claims any part of a submittal is exempt from disclosure under the Idaho Public Records Act, the Respondent must: 1.) Indicate by marking the pertinent document "CONFIDENTIAL"; and 2.) Include the specific basis for the position that it be treated as exempt from disclosure. Marking the entire proposal as "Confidential" is not in accordance with Idaho Public Records Act and will not be honored.

ITD, to the extent allowed by law and in accordance with these Instructions, will honor a nondisclosure designation. By claiming materials to be exempt from disclosure under the Idaho Public Records Act, Respondent expressly agrees to defend, indemnify, and hold ITD harmless from any claim or suit arising from ITD's refusal to disclose such materials pursuant to the Respondent's designation. Any questions regarding the applicability of the Public Records Act should be addressed to your own legal counsel prior to submission.

4. All information contained in this RFSOQ and acceptable provisions of the selected firm's response will be made a part of the executed agreement for services.
5. Upon request, the submitting firm shall submit additional information as requested by the ITD.
6. The ITD reserves the right to:
  - Waive any informalities or irregularities and reject any or all proposals received as a result of this RFSOQ
  - Select all or part of the respondent's proposal
  - Negotiate changes in the scope of work or services to be provided
  - Conduct investigations required to determine the submitting firm's performance record and ability to perform the assignments specified as a part of this RFSOQ
  - Negotiate separately with any source in a manner deemed to be in the best interests of the Agency
7. If, through any cause, the contracted firm shall fail to fulfill in a timely and proper manner its obligations under an dually executed agreement resulting from this RFSOQ, or if the firm shall violate any covenants, terms, or conditions of the agreement, then the Agency can cancel the contract without prejudice by giving at least five (5) days prior written notice to the firm of such termination.

## **ADDENDA**

In the event it becomes necessary to revise any part of this RFSOQ, addenda will be issued. Information given to one Respondent will be available to all other Respondents if such information is necessary for purposes of submitting an SOQ or if failure to give such information would be prejudicial to uninformed Respondents. It is the Respondent's responsibility to check the ITD public website at <https://itd.idaho.gov/business/> "Other Solicitations" tab for addenda prior to submitting the SOQ. Failure to do so may result in the proposal being declared non-responsive. No addenda will be issued fewer than four (4) business days before the proposal deadline unless the deadline is extended. Proposer shall indicate within their cover letter the addenda number(s) which they have incorporated into their submittal.

## **MODIFICATION OR WITHDRAWAL OF SUBMITTAL**

A submittal may be modified or withdrawn by the Respondent prior to the submission deadline set forth in this RFSOQ. After the submission deadline, the submittal shall remain in effect for a minimum of 90 days for evaluation purposes.

1. Name of firm, address, and telephone number of your firm's main office:

Firm	_____
Address	_____
City, State, Zip	_____
Telephone	_____
Email:	_____

2. Name, title, address, and telephone number of the firm's officer responsible to the Agency for all work to be provided, if awarded, as a result of this RFSOQ:

Name/Title	_____
Address	_____
City, State, Zip	_____
Telephone	_____
Email:	_____

3. Please check the appropriate box to identify the legal entity making this proposal.

Corporation  Partnership  Individual  Joint Venture

4. If a joint venture, please attach a separate sheet identifying other firm(s) in association.

5. If yes to any of the following questions, please attach a separate sheet of explanations; state the project(s), date, owner and reason.

Has your firm or joint venture failed to accept a contract or to complete a contract awarded to you?

Yes  No

Has your firm or joint venture under another or previous name failed to accept a contract or to complete a contract awarded to you?

Yes  No

Has your firm or joint venture had a contract terminated or been given written notice or demand incident to a proposed contract termination?

Yes  No

6. State the name, agent's name address, and telephone number of your current insurance company(s) that provides or during the past five (5) years have provided coverage for your firm in the areas of liability, builder's risk and workers' compensation.

Name	_____
Address	_____
City, State, Zip	_____
Telephone	_____

7. If yes to any of the following questions, provide complete explanation on a separate sheet.

Has you firm ever been denied coverage or had coverage terminated or cancelled by any insurer during the past five (5) years? If so, please state the company, date and reason.

Yes  No

Within the past five (5) years has your current firm or any predecessor organization been involved as a party or filed a claim in any bankruptcy, litigation or arbitration?

Yes  No

8. Name, title and signature of your firm's officer from No. 2 above who was responsible for the preparation of this form.
