

Distracted Driving

Distracted driving crashes are those where investigating law enforcement officer indicates that either inattention or a distraction in or on the vehicle was a contributing factor in the crash. Distraction is defined by the National Highway Traffic Safety Administration as a specific type of inattention that occurs when drivers divert their attention away from the task of driving to focus on another activity. Distraction is categorized into the three following types: visual (taking your eyes off the road), manual (taking your hands off the wheel), and cognitive (taking your mind off the road).

	2012	2013	2014	2015	2016	Change 2015-2016	Avg. Change 2012-2015
Total Distracted Driving Crashes	4,890	4,757	4,781	5,470	4,973	-9.1%	4.1%
Fatalities	41	43	39	51	64	25.5%	8.8%
Serious Injuries	422	339	364	425	367	-13.6%	1.5%
Visible Injuries	1,005	996	1,033	1,285	1,193	-7.2%	9.1%
Possible Injuries	1,792	1,831	1,846	2,211	2,121	-4.1%	7.6%
Distracted Driving Crashes as a % of All Crashes	22.8%	21.3%	21.6%	22.8%	19.6%	-13.8%	0.0%
Distracted Driving Fatalities as a % of All Fatalities	22.3%	20.1%	21.0%	23.6%	25.3%	7.1%	2.4%
Distracted Driving Injuries as a % of All Injuries	29.3%	27.9%	27.6%	29.7%	26.9%	-9.3%	0.6%
All Fatal and Injury Crashes	8,049	8,049	8,392	9,248	9,559	3.4%	4.8%
Distracted Fatal/Injury Crashes	2,116	2,112	2,200	2,569	2,355	-8.3%	6.9%
% Distracted Driving	26.3%	26.2%	26.2%	27.8%	24.6%	-11.3%	1.9%
Distracted Driving Fatality and Serious Injury Rate per 100 Million Vehicle Miles Of Travel	2.92	2.41	2.50	2.86	2.51	-12.0%	0.2%

Distracted driving crashes made up 20% of all crashes in 2016 and were responsible for 25% of all fatalities. While 72% of all distracted driving crashes occurred on urban roadways, 71% of the fatal distracted driving crashes occurred on rural roadways.

While only 20% of all distracted driving crashes involved a single vehicle, 45% of fatal distracted driving crashes involved a single vehicle.

The economic cost of crashes involving distracted driving was over \$1.1 billion dollars in 2016. This represents 26% of the total costs of Idaho crashes (as shown in Table 4).

Figures 15 and 16 on the following page show what the distractions were for crashes where the officer indicated Distracted in or on Vehicle as a contributing circumstance. There were 15 fatal and 949 total crashes that involved Distracted in or on Vehicle. Inattention makes up a larger portion of the distracted driving crashes. Of course, both Inattention and Distracted in or on Vehicle could be contributing circumstances in a single crash.
