Table 16 shows the changes in the number of licensed drivers in Idaho since 2010.

The graduated driver's license law took effect January 1, 2001. The law changed the requirements for operating a vehicle with a supervised instruction permit. These requirements must be met to obtain a class D driver's license: the permittee may not apply for a driver's license sooner than 15 years of age and no sooner than 6 months after completing a driver's training course; during the 6 month period, the permittee must accumulate 50 hours of supervised driving time with a licensed driver 21 years of age or older and 10 of the hours must be at night. All occupants of the vehicle must be properly restrained. If the permittee is convicted of any traffic violation or is found in violation of any of the restrictions of the supervised instruction permit, the permit is canceled and the 6 month period starts over from the date a supervised driving permit is reissued. The conditions of the supervised driving permit apply to everyone under 17 years of age that is attempting to obtain a driver's license. Once a class D license is obtained, driving is restricted to daylight hours for persons under 16 years of age. An amendment, taking effect July 1, 2003, allows 15 year old drivers to drive at night, as long as another licensed driver over the age of 21 is present. Another amendment, taking effect July 1, 2007, increased the number of months for the supervised driving period to 6 months and restricted the number of passengers not related to the driver to no more than one for drivers under the age of 17.

Also of note is the increase in the driving population over the age of 65 since 2010. That segment of drivers has increased from 16% of all licensed drivers in 2010 to 23% of licensed drivers in 2022. This is why we are seeing increased numbers of drivers over 65 in crashes. While being the safest drivers, there are more of them.

Drivers, ages 19 and under, were involved in 2.2 times as many fatal or injury traffic crashes as expected. This age group comprised 5.6% of all licensed drivers and accounted for 12.6% of drivers in fatal & injury crashes. Drivers, ages 20 to 24, were involved in 1.5 times as many fatal or injury crashes as expected. Young drivers continue to be over-involved in crashes.

Drivers 65 and older continue to be involved in half as many crashes as you would expect them to be.

### **Driver Gender Information**

Figure 9 shows the distribution of male and female licensed drivers, the percentage of drivers involved in all crashes, and the percentage of drivers involved in fatal crashes. Males comprise just over 50% of the licensed drivers, but accounted for 59% of the drivers in all crashes and 73% of the drivers in fatal crashes.

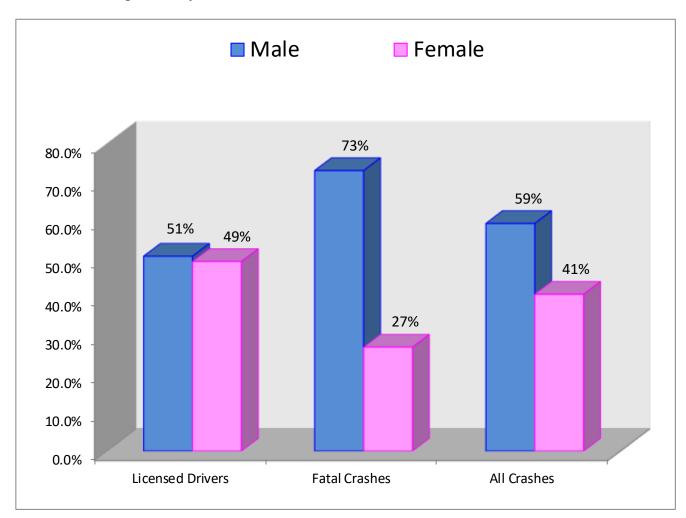

Figure 9 Comparison by Gender for Driver Licensure, and Crash Involvement: 2022

In 2022, males were 1.4 times more likely than females to be involved in any crash but were 2.6 times as likely as females to be involved in a fatal crash.

### **Crash Involvement by Driver Age and Gender**

Figure 10 shows driver involvement by age and gender for all crashes and Figure 11 shows driver involvement by age and gender for fatal and injury crashes. Figure 11 corresponds with the involvement numbers in Table 17 and shows how the involvement numbers breakdown by gender. For example (in Figure 11), 15 year-old male drivers were involved in 2.8 times as many fatal and injury crashes as expected, while female 15 year-old drivers were involved in 2.7 times as many fatal and injury crashes as expected.

## **Traffic Violations and Driver's License Suspensions**

The top ten traffic violations for which drivers were convicted in 2022 are presented in Table 18. The basic rule violations refer to Idaho Code that requires drivers to operate vehicles at a reasonable, prudent speed for the conditions and with consideration for actual and potential hazards.

Table Top Ten Traffic Violations

Information from the driving record is provided by the Division of Motor Vehicles within the Idaho Transportation Department.

Table 19 is a breakdown by age groups for selected traffic violations. The five violations shown comprise 61% of all violations for 2022. The basic rule violations refer to Idaho Code requiring drivers to operate vehicles at a reasonable, prudent speed for the conditions and with consideration for actual and potential hazards.

Younger drivers, especially those 19 years of age and younger, had violation rates well above the mean in areas shown to be major contributing factors in crashes, i.e., speeding, inattention, following too close, and failing to stop at stop signs and signals. Drivers age 20-24 had the highest rate for DUI violations.

This information is provided by the Division of Motor Vehicles within the Idaho Transportation Department and comes directly from driver's license records.

\*On July 1, 1994, legislation took effect creating the Administrative License Suspension (ALS) Program to suspend licenses of drivers who fail or refuse to submit to evidentiary testing for DUI. The ALS Program was placed in moratorium on March 17, 1995. The law was reinstated January 1, 1998.

The two largest categories of driver's license suspensions are failure to maintain insurance and administrative license suspension. These two suspensions accounted for 56% of all license suspensions. Driving under the influence accounted for 16% of all license suspensions.

The Division of Motor Vehicles of the Idaho Transportation Department provides the information concerning driver's license suspensions.
