Summary

At the Idaho Transportation Department (ITD) our Strategic Plan is “Your Safety, Your Mobility, Your Economic Opportunity.” ITD is committed to providing the safest transportation system possible. Each year progress is made to eliminate death and serious injuries (SI) on Idaho’s highways. Traffic safety professionals have addressed behaviors, infrastructure improvements and enforcement countermeasures to reduce crashes. The goal, “Toward Zero Deaths”, is the foundation upon which we work.

All data and tables are 5 years of data (2013-2017) except for the Fatalities and Serious Injuries graphs which are 10 years of data (2008-2017). The source of the crash information is the ITD statewide crash database which consists of crash reports completed by all law enforcement agencies in Idaho. For the purpose of crash reporting, commercial motor vehicles are buses, truck tractors, tractor-trailer combinations, trucks with more than two axles, trucks with more than two tires per axle, or trucks exceeding 10,000 pounds gross vehicle weight. This also includes pickups with dual rear wheels and smaller vehicles that are carrying hazardous materials.

Special points of interest:

- 16% of all Fatal Crashes
- 16% of all Fatalities
- 162 Fatal Crashes
- 176 People Killed
- 88% on rural roads
- 22% Interstates (rural and urban)
- 58% US or State Highways (rural and urban)
- 20% Local Roads (rural and urban)

Special points of interest:

Serious Injuries (2013-2017)
- 9% of all Serious Injury Crashes
- 10% of all Serious Injuries
- 448 Crashes
- 622 People Seriously Injured
- 58% on rural roads
- 22% Interstates (rural and urban)
- 42% US or State Highways (rural and urban)
- 36% Local Roads (rural and urban)
