NOTES:
1. USE 2" PC FROM EACH SIGNAL TO "POD" JUNCTION BOX TO EACH SIGNAL POLE BASE.
2. ALL NON-METALLIC RACEWAYS SHALL HAVE A #8 THWN GROUND CONDUCTOR.
3. SEE SIGNAL INTERSECTION PLAN SHEET FOR LOCATION OF JUNCTION BOXES.
4. VIDEO DETECTION CABLE SHALL BE TO THE MANUFACTURER'S SPECIFICATIONS. LEAVE 10" OF SPACE ABOVE THE CABINET AND AT THE CAMERA LOCATIONS.

SYMBOL CHART:
- [ ] indicates multi-conductors or single conductors (NBSA 1981 at 20'-1)
- [ ] indicates individual conductors or conductor breakout from cable
- [ ] indicates number of conductors and/or cables per consult
- "PC" denotes conduit size and type.
