UPDATE: Transportation Expansion and Congestion Mitigation (TECM) funded projects

THANK YOU for attending the pre-proposal information presentation on the upcoming Transportation Expansion and Congestion Mitigation (TECM) funded projects on Monday, June 7th. We appreciate everyone’s interest in these projects and allowing us to preview our timeframe and grouping of the projects in order to expedite agreements and delivery of these projects. We recognize there is a lot of work being advertised in short succession, and hope that this information is helpful in preparing to submit proposals for these projects.

At Monday’s presentation we shared a concept for grouping some of the projects into one request for proposal (RFP) and also posting the RFP’s in two-week intervals. However, based on feedback we have received after that presentation and continued internal coordination, the concept of “bundling” multiple RFP’s into one proposal will not be carried forward. The projects will now all be posted as individual solicitations shown in the table below with shorter page count and somewhat condensed criteria. These RFP’s will be posted in approximately the same order as what was presented at Monday’s meeting. We encourage you to monitor the Consultant Services [website](#) for open solicitations. The details and expected delivery timelines will all be detailed in the RFPs.
