## GENERAL SCOPE OF WORK

**Project Name: SMA-7611 W Bridge Street Bridge over Snake River, City of Blackfoot**  
**Project No.: A022(104)**  
**Key No.: 22104**

### **Introduction:**

The West Bridge Street Bridge over the Snake River in Blackfoot was built in 1936. Some rehabilitation was completed in 2011. This is a four-span bridge totaling 483 feet in length with the two main spans being steel thru-truss and the two approach spans being concrete. The bridge deck is 24-feet wide and has a 14.5-foot vertical clearance which restricts freight loads from crossing the river. This is one of the three river crossings for the city. This bridge provides direct access to ship manufactured goods from Blackfoot to the Idaho National Laboratory.

### **Objective:**

This project is to design the bridge replacement to meet current design and load requirements while creating a river crossing that accommodates freight. The project must accommodate the railroad crossing on the east side of the river while connecting to SH39 on the west side of the river. The consultant will apply ITD design standards, specifications, and procedures as required for federal-aid projects.

**Project Name: SH 39, Thomas to Collins Siding Road, Blackfoot**

### **Objective:**

This project would develop a two-way center turn lane on SH39 from MP 51.451 to MP 52.698. The intersection of SH39 and Collins Siding Road/Bridge Street will be analyzed for safety and improvements based on those findings.
