The department intends to notify the successful and unsuccessful Consultants as soon as practicable after the evaluations have been completed, and after approval has been given on the Evaluation Committee's recommendations.

As part of the selection process, the top-ranked firms may be required, at their expense, to give a presentation and/or answer interview questions.

GENERAL SCOPE OF WORK

This project proposes replacement of the existing bridge crossing the South Fork of the Teton River. It is structurally in poor condition according to the recent bridge inspection report. The proposed bridge replacement addresses important community needs by providing for a safe bridge and maintaining important transportation corridor between the cities of Teton and St. Anthony. Located in Rural Fremont County, this bridge is regularly used by both the public, and farmers accessing farmland in the area. The bridge has an Annual Average Daily Traffic of 1500 vehicles.

Current bridge was constructed in 1977 and quickly approaching the life expectancy of 50 years. The age, coupled with heavy use over the years has led to a poor condition rating, and load limits being posted. Piles under the footings have been scoured and are exposed. The existing bridge will be replaced with a 40-foot-wide and 180 feet long bridge to be part of the overall Teton Highway Improvement Project, rehabilitating a heavily used road and the bridge connecting cities of Teton and St. Anthony, and the greater part of Fremont County. The replacement of the bridge is most cost effective.

This work will include bridge design, materials investigation and analysis, environmental research and analysis, and all corresponding reports/documentation and applicable permits will be required. The selected consultant(s) will be required to develop the project from pre-concept through PS&E delivery and to be qualified in the following areas of expertise:

- Bridge Design
- Roadway Design
- Survey
- Environmental
- Geotechnical Investigation/Design
- Traffic Control Design
- Storm Water Pollution Prevention Plan Design
- Public Involvement
