Right-of-way acquisition is anticipated at select project intersections to accommodate 129k-lb truck turning movements. Minor storm drainage and culvert design is anticipated.

The Consultant will coordinate with the Sponsor and LHTAC and will provide the following services to design the roadway including:

- Roadway Materials Report including Traffic Analysis, Investigation, and Pavement Design
- Roadway Design

Major consultant scope of work milestones are anticipated to include preliminary design, environmental approval, design study report/design approval, final design review, and PS&E submittal. It is anticipated the project design process will not require more than 1.5 years to complete.
