RE: I-15, Northgate IC to Fort Hall IC, Bannock and Bingham County (Key Numbers 24307 & 24308)
April/May 2024 Project Pre-Advertisement Construction Review Meeting Invitation

To Interested Construction Contractors:

ITD invites interested contractors to participate in the pre-advertisement presentation meeting on April 4, 2024, for the construction projects on I-15 between the Northgate Interchange (IC) and Fort Hall IC. ITD is preparing to advertise the projects in April/May 2024. ITD will present an overview of the projects' scope and key features. This will help both ITD and the contracting community communicate for a successful project overall.

The total project limits of the two construction contracts are from just south of the Northgate IC to approximately 1 mile north of the Fort Hall IC north of Pocatello, Idaho. These projects will interface with two other I-15 projects, the I-86/I-15 System IC project on the south and the Fort Hall IC project on the north, both of which are currently under construction. These projects will widen and reconstruct I-15, including approximately 8 miles of asphalt paving of a new 6-lane highway with concrete median barrier and seven structures over/under I-15.

ITD is asking for your active participation. Please join us for the pre-advertisement presentation scheduled to begin at 8:00 a.m. (MST) on Thursday, April 4, 2024 using the Webex link below:
