

TO USE THIS MATRIX

There is no database which can track people moving from one county to another (Intrastate Migration). However, annual registrations can track the migration of family vehicles (cars, vans, and pickups) between counties - this ESTIMATES some volume, as the average Idaho driver owns approximately 1.2 cars. Example: 1,815 vehicles migrated TO Canyon County (read across) FROM Ada County (read down). Meanwhile, 1,660 vehicles migrated TO Ada County (read across) FROM Canyon County (read down) - a net loss of 155 cars from Ada County to Canyon County. Divided by 1.2 cars per driver, the implied population loss was 129.1 people from Ada to Canyon County (excluding children).

Example: A total of 3,246 vehicles moved out of Ada County while 3,747 moved in.

PASSENGER VEHICLE MIGRATION AMONG COUNTIES, 2010-2011
Based on County of Residence

Table with columns for counties and rows for counties, showing migration data. Includes a 'Total From' row and a 'Grand Total' row. The table is a matrix where rows represent the county of residence and columns represent the county of migration.
