1. Do not place concrete waterproofing system within limits of plug joint. Waterproofing system may be placed on tar paper to allow removal before placing plug joint material.

2. Provide joint sealant that meets the requirements of ASTM C920 for Type M, Grade P, Class 100/50 and use 1, and meets ASTM C719 for test movements ±100% and ±50% of the joint width as tested by an independent testing facility.
