GENERAL SCOPE OF WORK

W Side Frontage Rd, Madison County Key No. 20599

The construction of the Thornton Interchange on US-20 and the subsequent closures of the at-grade intersections between the County line and the University Blvd Interchange was completed in the fall of 2016. The at-grade access closures to US-20 included; 6800 S; 4300 S (Near Bear World); Thornton; and 3800 S. All of these access points to US-20 were consolidated to the grade separated interchange at Thornton. A frontage road along the US-20 corridor exists on the east side, however, a frontage road was not constructed on the west side. Consequently, all local traffic west of US-20 is forced to wind through the existing local roadways to access commercial, residential and recreational properties.

Madison County, particularly the City of Rexburg, has experienced a significant amount of growth and development. By the year 2040 the population is projected to be approximately 64,000 from 2010 population of 25,000. With the construction of the proposed roadway, this frontage road will become the most heavily used roadway west of US-20, south of Rexburg. As growth continues to the south and west of Rexburg the need to improve the connectivity in these areas will increase. In addition to reducing traffic conflicts in this area the proposed frontage road will greatly reduce the emergency vehicle response time when needed.

This project is 1.53 miles long and crosses Reid Canal with anticipated span length of less than 20 feet. Proposed two lane asphalt surface roadway is anticipated to be 28 feet wide with 100 feet right-of-way. The project will include new pavement marking.

This work will include materials investigation and analysis, environmental research and analysis, and all corresponding reports/documentation and applicable permits will be required. The selected consultant(s) will be required to develop the project from pre-concept through PS&E delivery and to be qualified in the following areas of expertise:

- Roadway Design
- Bridge Design
- Hydraulics
- Survey
- Environmental
- Geotechnical Investigation/Design
- Traffic Control Design
- Storm Water Pollution Prevention Plan Design
- Public Involvement
