Subject: 21860 US91 Park Lawn to Siphon Rd, Chubbuck - PSE no change NEPA EA re-eval

To Whom it May Concern:

The above-captioned project is ready for PS&E submittal. This e-mail is a notification to formally document the NEPA No Change Re-evaluation for the captioned project, as outlined in the ITD/FHWA NEPA Re-evaluations and Environmental Commitments Guidance (2024).

The District's Environmental Planner and Project Manager verify the following:

There have been no changes to:

- Scope of the project
- Existing conditions (e.g. land use, traffic volumes, development, social impacts, public involvement etc.)

And no new:

- Federal or State Environmental Laws/Policies have been published, however the FHWA/ITD EJ Programmatic is no longer valid.
- Listed species or designated critical habitat was added to the IPaC Official Species List which was requested via IPAC on 6/1/2026, however the Suckley's cuckoo bumblebee was added as proposed for listing.
- The Army Corps issued Sec 404 permit NWW-2026-00133 NWP46 on 5-22-2026. They did not require mitigation for permanent impacts to wetlands under Sec 404 so ITD will satisfy EO11990 with the wetland mitigation plan already included in the project plans that meet Sec 404 standards for mitigation. The mitigation is included in the project plans and under previous NEPA approvals.

The original NEPA decision remains valid. The date of this e-mail serves as the Re-Evaluation approval date.

Sincerely,

Alissa Salmore

Environmental Planner
