**Project No. A021(860), Key No. 21860**  
**Bannock County, Idaho**  
**HAZARDOUS MATERIALS MEMORANDUM**

---

### Study Area

The study area was searched for existing, known and potential sources of hazardous materials. The study area, or search radius, was taken from the American Society for Testing and Materials (ASTM) Standard E 1527-13:

- National Priority List (NPL) – 1 mile
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) – 1/2 mile
- Corrective Actions on Resource Conservation and Recovery Act Treatment, Storage, and Disposal Sites (CORRACTS RCRA-TSD) – 1 mile
- Corrective Actions on Resource Conservation and Recovery Act Non-Treatment, Storage and Disposal (CORRACTS RCRA non-TSD) – 1/2 mile
- RCRA Generators – Target Property
- Emergency Response Notification System (ERNS) – Target Property
- Municipal Solid Waste Landfills (MSWL) – 1/2 mile
- Registered Underground Storage Tank (UST) – Target Property
- Registered Leaking Underground Storage Tank (LUST) – 1/2 mile

Sources of information include the Environmental Protection Agency Envirofacts Database, the Idaho Department of Environmental Quality's (IDEQ) Facility Mapper (Terradex), and the National Response Center Database.

### Existing Conditions

Table 1 presents the results of the database search and includes three UST, two LUST, six RCRA Generators, and five general remediations. Figure 1 illustrates the approximate location of these sites. The search revealed no NPL, CERCLIS, CORRACTS RCRA-TSD, CORRACTS RCRA non-TSD, ERNS, or MSWL sites within the ASTM-required search radius.

**Summary**

The Hazardous Material Administrative Review has been completed with information to date (September 2023). Due to the close proximity of 12 sites, public record requests were sent to IDEQ on September 15, 2023. Inspection of the documentation provided by IDEQ determined that all 12 of the sites have been remediated with no further action required or contamination was limited to the property of the site. Supporting documentation obtained from the public record requests is attached to this memorandum. If contamination is encountered during construction, IDEQ should be notified. However, the probability of risk associated with construction in the area is low.

Pocatello, Idaho 83204

Re: Petroleum contamination in dry well south of 108 E.Chubbuck Rd,  
Chubbuck, Idaho.

Dear Mr. Roberts,

This letter is to supply you with the information required  
by Section 16.01.02.852.03 of the Idaho Water Quality Standards  
and Wastewater Treatment Requirements at the above referenced site.

Frasure Construction was hired by Valenty & Sons, Inc. to replace  
a dry well on its property that was not draining properly. Work  
began Sept. 27/28, 1999. Removal of the old dry well revealed  
apparent petroleum contamination of the surrounding soil. You  
were contacted, Boyd, by Steve Smart of the City of Chubbuck  
and a stop work order instituted until proper procedure for  
continuing could be outlined.

That procedure was as follows: With you and I on site, Frasure  
dug the hole deeper until both visually and by smell the zone  
of contamination had been removed. At this point, Jim Day of  
High Country Services was called in and soil samples from the  
bottom of the hole were taken and sent off for analysis.

Results of the analysis showed all potential contaminants to  
be below acceptable levels. You then gave me the verbal OK  
to have Frasure complete installation of the new dry well and  
re-blacktop the area, which is now done. (Test results are in-  
cluded with this letter).

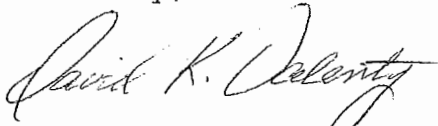

The source of the contamination is believed to have been  
unauthorized dumping of used crankcase oil by a previous  
commercial renter of the building immediately south of this  
location. All current parties in the area are aware of the  
misuse and therefore no further contamination is anticipated.

The hauled off material is currently being and will be farmed  
by Frasure Construction for a period of 6 months, at which  
time it will be tested and disposed of as required.

I would anticipate that I'll need to submit concluding report(s) when the hauled off material procedure is complete. Aside from that, I would like to request that the project be closed with no further action required.

And I want to thank you, Boyd, for your cooperation, help, and decency in this matter.

Sincerely,

A handwritten signature in cursive script, reading "David K. Valenty". The signature is written in dark ink and is positioned above the typed name.

David K. Valenty, President  
Valenty & Sons, Inc.

**Re: Closure for the Motor Vehicle Waste Disposal Wells Located at 5160 Yellowstone Ave.  
in Chubbuck**

Dear Mr. Wilding,

On June 28, 2022, the Idaho Department of Environmental Quality (DEQ) received the *Sump Summary and Sample Results* for the motor vehicle waste disposal wells located at 5160 Yellowstone Ave. in Chubbuck.

DEQ has reviewed the documentation and based on the data presented DEQ will not require additional assessment or corrective action for the closure of the motor vehicle waste disposal wells. This determination is based solely upon the information you provided and does not constitute an environmental assessment of the entire property.

If you have any questions or concerns, please contact me at (208)236-6160 or [amanda.hardy@deq.idaho.gov](mailto:amanda.hardy@deq.idaho.gov). Thank you for your cooperation.

Sincerely,

Subject: Chubbuck Groundwater Contamination Site, Bannock County, EPA ID Number  
ID0002463701, Non-NPL Status Other Cleanup Activities: State-Lead Cleanup

Dear Ms. Kawabata:

The Idaho Department of Environmental Quality (DEQ) has reviewed the file associated with the Chubbuck Groundwater Contamination Site (EPA ID Number ID0002463701). This site is on EPA's CERCLIS database under Non-National Priorities List (NPL) Status Other Cleanup Activities (OCA): State-Lead Cleanup. Tetrachloroethylene (PCE) was identified in the early 1990s above the maximum contaminant level in one of the drinking water supply wells for the City of Chubbuck, Idaho.

The Army Corps of Engineers conducted a Site Investigation of the Naval Ordnance Plant, Pocatello, and found low levels of PCE in the ground water. EPA Region 10 conducted an Expanded Site Inspection (ESI) of the area (north Pocatello and Chubbuck) to identify potential sources of PCE in ground water. The ESI was conducted between 1998 and 2000 by EPA's contractor, Ecology and Environment. Low levels of PCE were found to be widespread in the general area. However, no specific PCE sources were identified.

PCE continues to be detected in the ground water and the City of Chubbuck has placed treatment (air stripping) on one of their drinking water wells (Well #4). Unless additional information regarding PCE ground water contamination in Chubbuck, or potential PCE sources are identified, DEQ anticipates no further action for the Chubbuck Groundwater Contamination Site. DEQ will continue to work with the City of Chubbuck and other public drinking water systems under the Drinking Water Program.

If you have any questions, please contact the DEQ Pocatello Regional Office at (208) 236-6160, or me at (208) 373-0188 or via mail at [michael.mccurdy@deq.idaho.gov](mailto:michael.mccurdy@deq.idaho.gov).

RE: Idaho Hazardous Waste Generator quarterly report.

Dear Mr. Pickens,

The City of Chubbuck generated hazardous waste during the second quarter of 1993. That material was entirely removed and placed in a secure landfill at EnviroSafe. The City of Chubbuck completed quarterly reports for the first and second quarters in compliance with the regulations.

It is my understanding that the City will not be required to submit further quarterly reports since we are no longer generating the hazardous waste. If I am incorrect would you please respond and inform me of the correct procedures. Your help is much appreciated.

Sincerely,

Steven M. Smart  
Public Works Director

**Re: Motor Vehicle Waste Disposal Well Closure for Switchback Motorsports, Pocatello, Idaho 83202**

Dear Mr. Nickerson:

On September 29, 2020 the Idaho Department of Environmental Quality (DEQ) inspected the Motor Vehicle Waste Disposal Well (MVWDW) at Switchback Motorsport, Pocatello, Idaho. During the inspection it was documented that the MVWDW had recently been installed and there were no signs it had ever functioned as a MVWDW.

Based on the inspection DEQ will not require environmental assessment or corrective action at this time for the closure of the MVWDW. This determination is based solely on the inspection and information you provided and it does not constitute an environmental assessment of the property.

If you have any questions or concerns, please contact me at (208)236-6160 or [amanda.hardy@deq.idaho.gov](mailto:amanda.hardy@deq.idaho.gov).  
Thank you for your cooperation.

Pocatello, ID 83201

**RE: UST Removals – 231 West Siphon Road, Chubbuck, Idaho**

Dear Mr. Finkelburg:

The Idaho Department of Environmental Quality (DEQ) is in receipt of the lab analysis from the two tanks that were removed at the property at 231 West Siphon Road in Chubbuck.

We have received the laboratory analysis of the soils from under the removed tanks. The residual levels of the chemicals of concern in the ground pose limited risk when compared with the Idaho risk screening levels.

Based on the data submitted, **the DEQ requires no further action at this time.** It is recommended that you maintain this letter and the analytical results indefinitely with the property.

If you should have further questions regarding this matter, please feel free to contact me at (208) 236-6160.

Sincerely,

Pocatello, ID 83202

Dear Mr. Knoll:

Re: Inactivation of EPA I.D. Number

In response to your October 17, 2003, request, EPA I.D. Number IDR000201178 for the Premier Technology location at 1500 Mooney in Pocatello, Idaho, has been inactivated.

Should you have any questions regarding this matter or wish to reactivate this number in the future, please contact me at 208/373-0210.

Sincerely,

A handwritten signature in cursive script that reads "René Anderson".

Mr. Mike Hoehner, President  
Steel West, Inc.  
P.O. Box 5427  
Pocatello, ID 83202

RE: November 10, 2011 Warning Letter

Dear Mr. Hoehner:

This letter is in response to your Warning Letter submittal dated November 18, 2011.

Your response to the November 10, 2011 Warning Letter, listing the apparent violations of the Idaho Hazardous Waste Management Act (HWMA) and the Federal Resource Conservation and Recovery Act (RCRA), together with the information you provided to Julie Worth by telephone on November 21, 2011, appears to be adequate and appropriate. No further action on the part of Steel West, Inc. is necessary in this matter.

This letter does not relieve your facility from future compliance with the HWMA/RCRA and the Idaho Rules and Standards for Hazardous Waste. Thank you for your cooperation in this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Brian R. Monson", is written over the word "Sincerely,".

Dear Mr. Olsen:

Re: Inactivation of EPA I.D. Number

In response to your October 13, 2011, letter, EPA I.D. Number IDR000203281 for the Safety-Kleen Systems, Inc. location at 180 Southside Way in Chubbuck, Idaho, has been inactivated.

Should you have any questions regarding this matter or wish to reactivate this number in the future, please contact me at 208/373-0210.

Sincerely,

A handwritten signature in blue ink that reads "René Anderson".
