

Idaho Department of Fish and Game

Please note: The quantity and quality of data collected by the Idaho Department of Fish and Game (IDFG) are dependent on the research and observations of many individuals and organizations. In most cases, these data are not the result of comprehensive or site-specific field surveys; many natural areas in Idaho have never been thoroughly surveyed. For these reasons, IDFG cannot provide a definitive statement on the presence, absence, or condition of biological elements in any part of Idaho. IDFG reports summarize the existing information known to the IDFG at the time of the request regarding the biological elements or locations in question. They should never be regarded as final statements on the elements or areas being considered, nor should they be substituted for on-site surveys required for environmental assessments.

The contents of this document are for informational use only and not to be used in place of official consultation from the Idaho Department of Fish and Game.

Species Occurrences

i Category: ☐ ESA species only ☐ Observed (👁) species only ☐ Target (🎯) species only

SGCN Status: State Conservation rank:

Endangered Species ¹

Please note that the information in this section may not be used in place of official consultation for threatened and/or endangered species from the US Fish and Wildlife Service.

Yellow-billed Cuckoo *Coccyzus americanus*

Category: Bird
ESA Status: Threatened
SGCN: Tier 1
State Rank: S1B
Global Rank: G5

Species of Greatest Conservation Need ²

Morrison's Bumble Bee *Bombus morrisoni*

Category: Invertebrate
SGCN: Tier 1
State Rank: S4
Global Rank: G3

Suckley's Cuckoo Bumble Bee *Bombus suckleyi*

Category: Invertebrate
SGCN: Tier 1
State Rank: S2
Global Rank: G2G3
