Subject: Geotechnical Engineering Report Addendum No. 1
SH-3 St. Maries River Bridge
Shoshone County, Idaho
File No. 4420-218-00

Introduction and Project Understanding

This geotechnical engineering services report addendum presents the results of our ongoing groundwater monitoring for the SH-3 St. Maries River Bridge project. This is an addendum to our Geotechnical Report dated December 16, 2025 (Geotechnical Report Revision 2). This addendum should be used in conjunction with our Geotechnical Report.

Groundwater Data

One monitoring well (GEI-3-24) was installed at the site as part of our geotechnical engineering services for the project. The location of the well, the summary exploration log and other details about our exploration program are provided in our Geotechnical Report. Figure 1 presents the water elevation measured by a pressure transduced in GEI-3-24 from July 31, 2024 to October 1, 2024 and October 16, 2025 and June 11, 2026. The referenced ground surface elevation is based on survey data provided by David Evans and Associates, Inc. Groundwater elevation was estimated based on the referenced ground surface elevation. Additional details regarding soil and groundwater conditions at the site are provided in our Geotechnical Report.

Limitations

We have prepared this report addendum for David Evans and Associates, Inc. (DEA) for the SH-3 St. Maries River Bridge project in Shoshone County, Idaho. DEA may distribute copies of this report to owner's authorized agents and regulatory agencies as may be required for the Project.

Within the limitations of scope, schedule and budget, our services have been executed in accordance with generally accepted practices for geotechnical engineering services in this area at the time this report addendum was prepared. The conclusions, recommendations, and opinions presented in this report addendum are based on our professional knowledge, judgment, and experience. No warranty, express or implied, applies to the services or this report addendum.

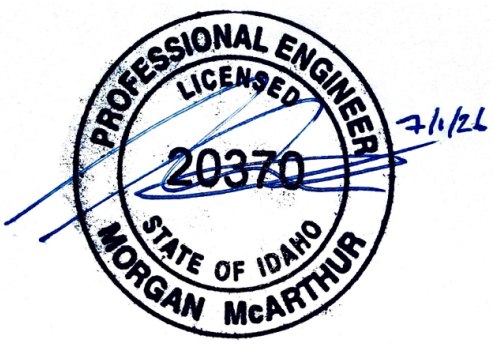

Except as modified herein, Report Considerations presented in our Geotechnical Report Revision 2 dated December 16, 2025 also apply to this report addendum.

We trust this report addendum meets your current needs.

Sincerely,
GeoEngineers, Inc.

Valerie R. Yañez
Geotechnical Engineer
