Interested Contractors

RE: Pre-Advertisement Project Overview
ITD Project Key Number: 23958, SH-16, SH-44 Interchange, Ada County

To Interested Construction Contractors:

ITD invites interested contractors to participate in the pre-advertisement presentation meeting on March 13th 2025, for the SH-16, SH-44 Interchange construction project. ITD is preparing to advertise this project in March/April 2025. ITD will present an overview of the project's scope and key features. This will help both ITD and the contracting community prepare for a successful project overall.

The project limits are SH-16 from MP 1.6 to MP 2.6 in Star, Idaho. The project will construct a new partial cloverleaf interchange at the intersection of SH-16 and SH-44, including a loop ramp in the northwest quadrant for westbound SH-44 to southbound SH-16 traffic. Grade separation will occur with SH-16 going over SH-44. This is a multi-year, multi-phased project.

ITD is asking for your active participation. Please join us for the pre-advertisement presentation scheduled to begin at 2:30 p.m. (MST) on Thursday, March 13, 2025 using the Webex link below:
