

# Presentation of the Final Design

## *I-84, I-86 Salt Lake System Interchange Project*

The purpose of the project is to improve safety and mobility on the I-84, I-86 interstate system interchange. The project will include replacement of the aging bridge structures built in 1960 due to functional obsolescence and width restrictions. The new design will address existing roadway geometric issues and will make I-84 the primary route through the interchange. Construction is planned to start in late 2017 and conclude in late fall 2019.

**When:** **Wednesday, September 13, 2017 – 7:00 a.m.**  
**Mini-Cassia Transportation Committee Meeting**

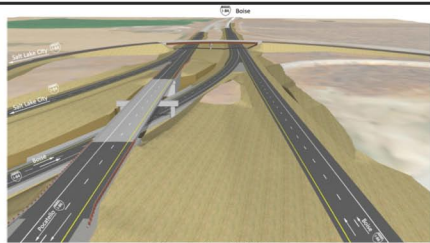

**Where:** **Connor's Cafe**  
335 S 600 W, Heyburn (I-84 Exit #208 - North side of I-84)

**What:** **Presentation of final design**

- *Replacement of the two existing aging bridge structures*
- *Resolution of the existing insufficient geometrics in the ramps*
- *Reconfigure the interchange to make I-84 the primary route*
- *Construction approach, schedule and traffic control plan*
