

Partnering with Small Businesses

Valuing Diversity

In 2020, Idaho Power purchased nearly
\$138.2 MILLION
in goods and services from
Idaho businesses, of which nearly
62.5% WENT TO SMALL BUSINESSES.

Idaho Power believes supporting suppliers with diverse backgrounds, opinions and perspectives makes them a more nimble and effective company. We strive to engage and support small, local and diverse companies who provide goods and services at competitive prices, provide contracting opportunities and drive the local economy.

That's why Idaho Power invites small, diverse and/or local businesses to register to do business with us. Our new online supplier registration tool allows businesses to register for possible upcoming opportunities and to see what types of goods and services the company needs — from landscaping to roofing, other construction services and more!
