### Additional Details

Other Information:	
--------------------	--

The Project includes the following Work:

1. Expansion of the existing bioreactor from a 3-stage A2O process to a 5-stage Bardenpho process. Work includes the addition of a post-anoxic zone, a post aerobic zone, and associated equipment.
2. Furnishing a supplemental carbon unit.
3. Mixed liquor recycle (MLR) piping improvements.
4. Provide new redundant high speed aeration blower.
5. Provide new redundant sludge thickening equipment which includes construction of a new building with thickening room, chemical room, and electrical room. Work also includes a new equipment platform, HVAC systems, replacement of existing WAS pumps and installation of new VFDs, and associated structural, mechanical, electrical and instrumentation necessary to create a complete and workable system.
6. Pretreatment Building improvements including expansion of existing building, installation of new redundant mechanical fine screen with screenings washer/compactor, HVAC improvements, and other miscellaneous electrical, controls, building, piping and valve improvements.
7. Provide a new sewage receiving station.
