Summary

At the Idaho Transportation Department (ITD) our Strategic Plan is “Your Safety, Your Mobility, Your Economic Opportunity.” ITD is committed to providing the safest transportation system possible. Each year progress is made to eliminate death and serious injuries (SI) on Idaho’s highways. Traffic safety professionals have addressed behaviors, infrastructure improvements and enforcement countermeasures to reduce crashes. The goal, “Toward Zero Deaths”, is the foundation upon which we work.

All data and tables are 5 years of data, (2011-2015) except for the Fatalities and Serious Injuries graphs which are 10 years of data (2006-2015). The source of the crash information is the ITD statewide crash database which consists of crash reports completed by all law enforcement agencies in Idaho.

Special points of interest:

Fatalities (2011-2015)

- 118 fatal crashes
- 13% of all fatal crashes
- 119 people killed
- 12% of all people killed
- 58% crashes only involved motorcycle
- 56% killed were not wearing helmets
- 71% crashes on rural roads
- 11% crashes on interstates (rural and urban)
- 53% crashes on US or state highways (rural and urban)
- 36% crashes on local roads (rural and urban)

Serious Injuries (2011-2015)

- 731 serious injury crashes
- 14% of all serious injury Crashes
- 807 people seriously injured
- 12% of all people seriously injured
- 51% crashes only involved motorcycle
- 43% seriously injured were not wearing helmets
- 46% crashes on rural roads
- 7% crashes on interstates (rural and urban)
- 41% crashes on US or state highways (rural and urban)
- 52% crashes on local roads (rural and urban)
The graph shows the percent of crashes in the county compared to the percent of licensed drivers in a county.

This graph represents some of the other contributing factors or characteristics in fatal and serious injury motorcycle crashes.
